

**WATER TREATMENT,
NETWORK HEALTH**

Water Treatment

Water, high stakes for humanity

The United Nations recognized “the right to safe and clean drinking water and sanitation as a human right that is essential for the full enjoyment of life and all human rights.” Water is a fundamental, limited, precious resource: over a billion people do not have access to clean drinking water, and thousands die every year from drinking contaminated water.

Conserving water: **ODYSSEE Environnement**[®] has made water protection its main mission and the purpose of its research and expertise. Saving, safeguarding, decontaminating and desalinating: water is crucial to the survival of humankind. And it will be the most important challenge facing us in the coming years.

Happy is he who, like Ulysses, finds sweet journey's end...

In terms of development, **ODYSSÉE Environnement**[®] 's growth is based on **LARGE INTER-CONTINENTAL NETWORK OF RETAILERS** trained on our technology. They are committed to lasting relationships and can support you anywhere around the world. The French touch: they are now meeting in the Great Lakes Region of the United States to train the **Polyamines Team**.

Your Systems under Close Supervision

ONLINE SOFTWARE

Our **ODYSECURE**[®] management assistance software lets you remotely monitor your water treatment systems and keep them within safe operating parameters.

All data relating to your system's operation are remotely managed by a configurable software program that is clear, efficient and accessible online from your smartphone.

HARDWARE

On site, the Odybox[®] unit connected to your equipment, both old and new, collects useful data for managing your water treatment system before sending them to the interface via GPRS.

The Right Tools

On-site eco-friendly biocide treatment

Clever, economical and efficient:
produces green biocide in situ
as a substitute
for chemical treatments.

Process / Equipment Supplier

Innovation

Monitor your systems remotely to keep them within safe operating parameters.

Systems under close online supervision

PERFORM EVEN BETTER

BY AVOIDING:

- OVER-CONSUMPTION
- CRISIS SITUATIONS
- EMERGENCY ACTIONS
- PRODUCTION SHUTDOWNS
- MEETINGS, REPORTS, INTERVENTION OF HEALTH CARE AGENCIES...
- COMPLAINTS PROCEDURE, ETC.

You can monitor your systems while freeing up working time, thanks to our highly ECONOMICAL subscription plans.
