HIGH PERFORMANCE SOLUTIONS  
MANUFACTURER

# Our vision

---

## We want to reconcile IT with the planet.

**Today** we provide high performance servers able to reduce energy consumption.

**Tomorrow**, we will reuse waste heat and develop a cradle to cradle approach.

### #powerReductionNeed'19

Reducing the power consumption of high-performance servers

### #reusEnergies'23

Reuse of fatal heat from servers for other purposes

### #producElectricity'25

Creation of alternative sources of electricity

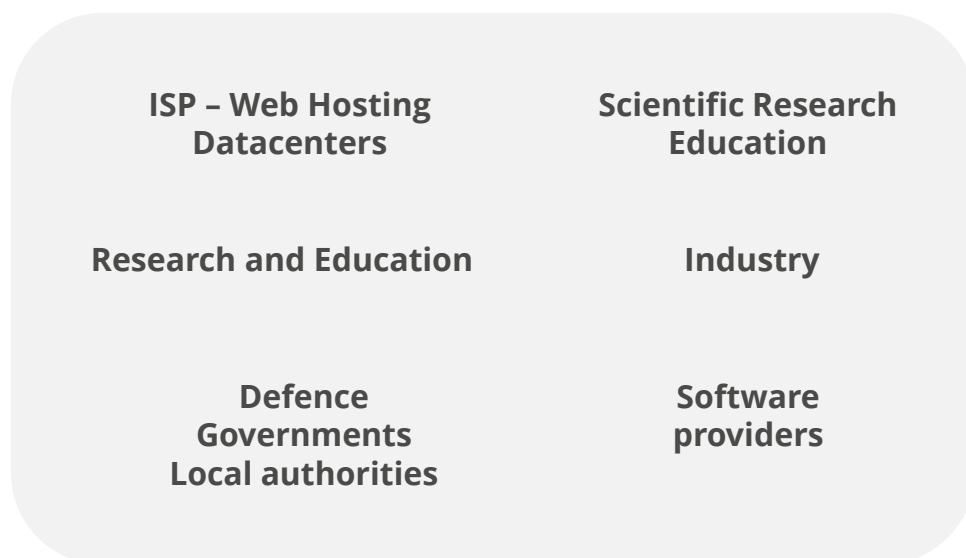

# Our core business

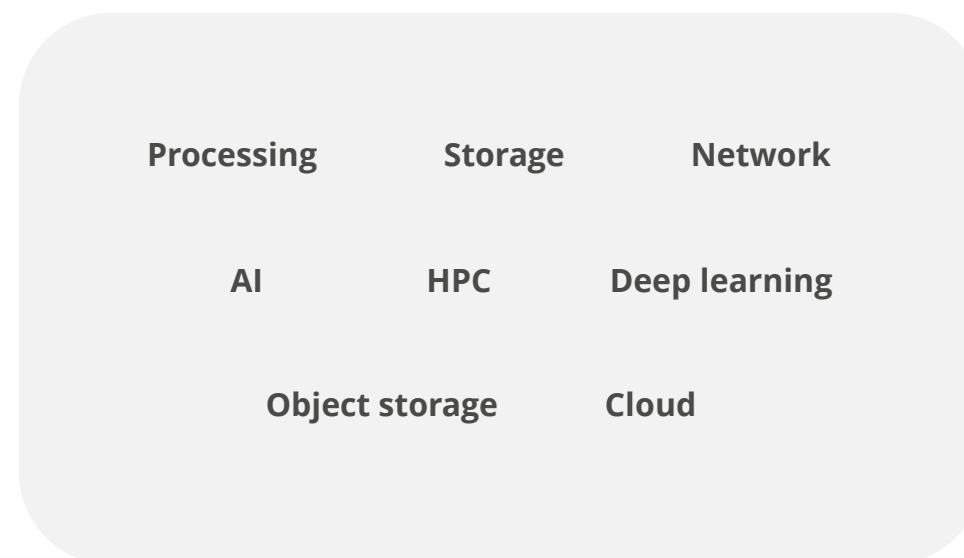

**Design, manufacture and sell customised, environment-friendly high-performance IT servers**

...for a diverse range of sectors...

...and 'critical' needs.

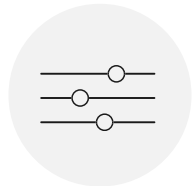

# Our high-value proposition

## HIGH PERFORMANCE

Power, speed, energy savings

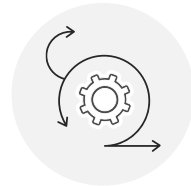

## CUSTOMISED

Optimised products, tailored solutions  
Use-based invoicing (buy or lease)

## SMART DESIGNS

Simple, flexible and scalable designs

## OPERATIONAL AGILITY

Specific resources allocated to each project

## GREEN IT

Reducing the carbon footprint of investments  
and operating costs

# Innovation is our DNA

## HEXAPHI

The best density/  
Computing speed

2014

## OpenBLADE

Hyperconverged

2015

## OCtoPus

Reduced  
consumption

2017

## ATLANTIS

Immersion cooling  
For 19" servers

2018

## SERVICES

Efficient datacenters,  
Processing power  
rental

2019/2020

## DIRECT LIQUID COOLING

Liquid contact  
cooling

2019/2020

Server power  
consumption  
reduced by 23%

OPEX -60%

Energy recycling  
(heat re-used)

Fatal heat  
Re-use system

# A wide offering

*covering various market needs*

---

	Storage	Process / Compute	Hyperconvergence
Hyperscalers	ULYS 460	OCtoPus 1.4 OCtoPus 3	OpenBlade OpenBlade 2.0
Larges corporates	ULYS SAN ULYS S24HA	Godi	
Mid-size co.	ULYS S24	Cloe 4SP	OCtoPus 4 / 5 / 8
SMEs	ULYS 1.10	Mini Rugged Computer	Micro Cluster
Industries	NUC+HDD	Ultra Slim	OCtoPus 3BD

“

Today we are **reducing energy consumption**.  
Tomorrow we will **recycle the heat by reusing it**  
and we start to think about the ultimate step  
which is the **production of electricity**, to **use**  
**that heat as an alternative source of energy**  
**production** for others uses. ”

Alain Wilmouth, Founder of 2CRSi
