

All Solar provides a unique solution for:

- Low cost houses with solar roof*
- Lower cost power with space heating*
- Clean water by reverse osmosis*
- Solar Greenhouses*
- Design of charging stations – carports*

Patent pending All Solar panel with a UV rated coated top film and polycarbonate twin wall sheet test panel. Our panel has demonstrated solar performance comparable to conventional solar panels

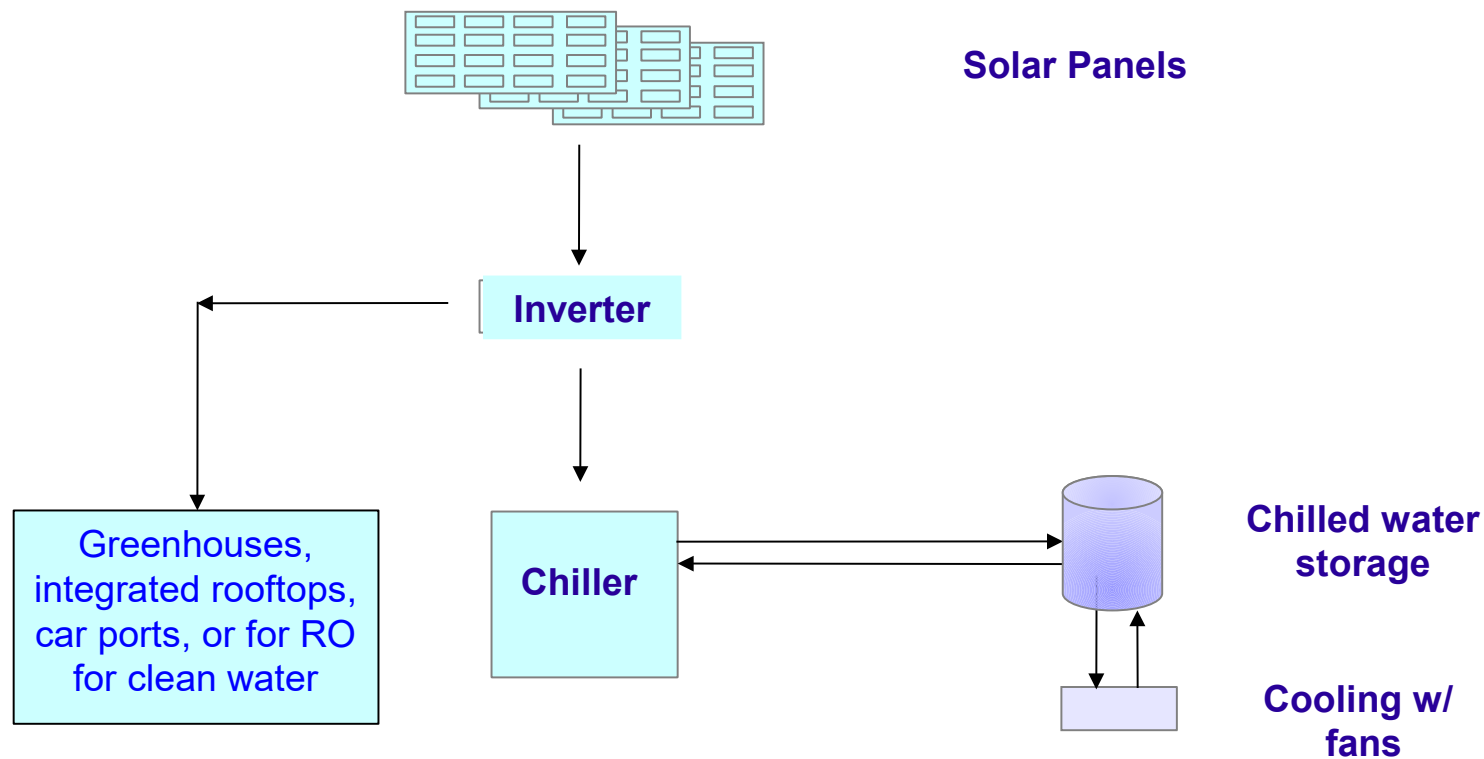

- Provisional U.S. Patent
- U. S. Patent filed in January, 2014

ALL SOLAR International, Inc.

- *Weight reduction of 50%*
- *Cost saving of 33% due to weight reduction resulting in easier installation, less man hours and no needed change in structural elements of existing buildings, rooftops.*
- *Zero carbon emission technology*
- *Lower cost power and clean water for California*

All Solar panels can be used for greenhouses or to generate clean water by “RO” (reverse osmosis) in California from sea water.

ALL SOLAR possesses seasoned executives to launch these unique concepts expertly and at a reasonable cost.

George Tharisayi

President, All Solar International, Inc.

- Solar energy research of ten years
- Possesses over thirty years experience in design engineering, manufacturing, project management and consulting
