A Swiss organisation, focused on providing pure and safe drinking water through innovating and clean technologies.

Braun AERIS2AQUA International is committed to donate 10% of it's profit to communities with lack of access to pure and safe drinking water.

Pure and safe drinking water is a Human Right.

The World is running Dry. The Scarcity of Safe Drinking Water Forces Us to Rethink the Concept.

Only 0.007% of our planet's water is readily available to hydrate its 7.7 billion people.

50 % of India faces drought.

Every year, 800,000 African children die from diarrhea. That's one child every 20 seconds

In Indonesia, 27M people are lack access to drinking water

In Taiwan, 44% of tap water is contaminated with **micro-plastic** particles.

3 billion find water scarce for at least one month of the year.

In the USA , there is **perfluoroalkyls** contamination of drinking water, and 13 States have TCP-tained water.

1 in 9 of our planet's population lack access to clean, affordable water within a half an hour of their homes

In Germany, there is **Nitrate** in groundwater in many places.

Germany, of 32 bottled water brands tested, including international brands, only 15 were rated "good". Many contained **bacteria**.

Many African women and children walk up to six hours daily to collect water, and more then 300 million lack safe drinking water completely.

More Than 90% Of **BOTTLE WATER** Sold Worldwide Is **CONTAMINATED**

ELECTROLYZER COLOR MEANING:

- ACIDS, FLUORIDE AND OTHER ORGANIC MATTER
- ARSENIC, MERCURY, LEAD, COPPER, SODIUM
- BACTERIA, VIRUSES, CARCINOGENS, CHEMICAL FERTILIZERS, PESTICIDES, AND MORE
- IRON, RUST, AND BACTERIA
- LEAD, ZINC, MERCURY, INORGANIC COMPOUNDS
- HEAVY METALS

WHO review: **MICROPLASTICS** found in 90% of Bottled Waters

Researchers found that levels of plastic fibers in popular bottled water brands could be twice as high as those found in tap water

The World Health Organization (WHO) has announced a review into the potential risks of plastic in drinking water after a new analysis of some of the world's most popular bottled water brands found that more than 90% contained tiny pieces of plastic. A previous study also found high levels of microplastics in tap water.

In the new study, analysis of 259 bottles from 19 locations in nine countries across 11 different brands found an average of 325 plastic particles for every liter of water being sold. In one bottle, concentrations were as high as 10,000 plastic pieces per liter of water. Of the 259 bottles tested, only 17 were free of plastics, according to the study.

Pure Drinking Water from the Air **PRESERVES NATURAL RESOURCES**

Large organizations are currently monopolizing most spring water sources in our planet and affecting local communities by leaving them without access to safe drinking water.

These giants “steal” each 100,000 Liters for US\$0.65 and sell each liter for \$2.00.

However, the air can not be monopolized.

Safe Drinking Water is a Human Right.

“WHY Pure and Safe Drinking Water From The Air?”

“Because it’s impossible to control *ground* contamination.”

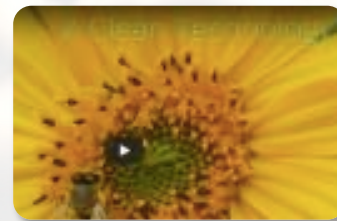

EXTRACTING Pure and Safe Drinking Water From The Air

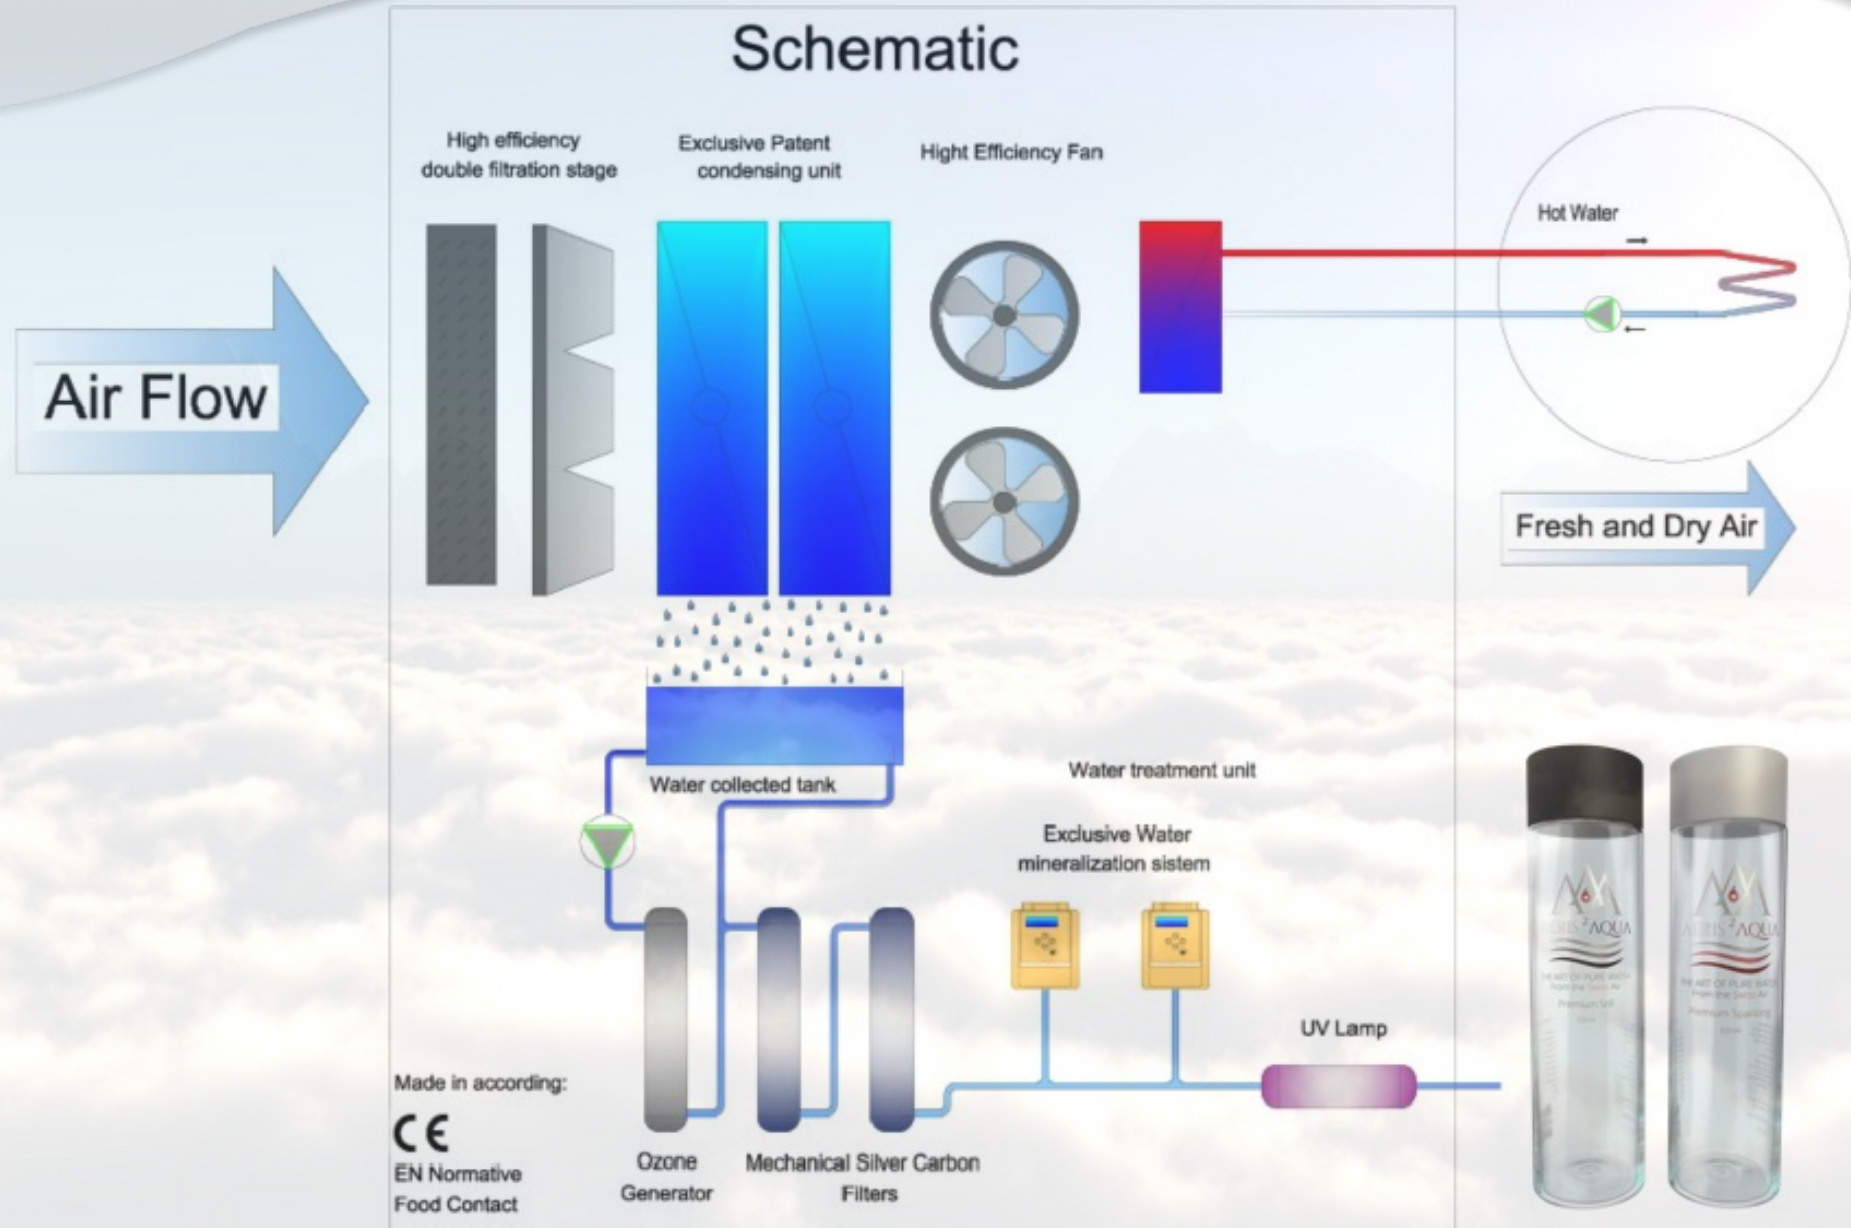

Our solution draws our precious water directly from the air. Cooled and condensed, the air ultimately forms the crisp soft drops of AERIS²AQUA

Filtering and sterilization through ultraviolet ensures the clean quality of each drop without depleting any of the earth's precious resources - making this The Art of Pure Water from the Swiss Air.

HOW IT WORKS Extracting Water From The Air

SOCIALLY AND ENVIRONMENTALLY RESPONSIBLE

- 
- A large, semi-transparent circular image in the background shows a pair of hands gently cupping a small globe of the Earth. The hands are positioned as if protecting or nurturing the planet. The background of the slide is a soft-focus image of clouds.
- Our water generation systems do not return impurities to the water source or into the local ecosystem.
 - The extraction of water from ambient air provides an almost unlimited source of clean drinking water without damaging the local ecosystem.
 - Our systems can be connected to solar cells, wind farms and other renewable energy sources to lower further the carbon footprint.
 - The use of only 30% of the energy produced by a 1000 liters daily water production reduces CO2 yearly emissions already by over 280 tons.
 - ZERO plastic used for drinking water!

- To preserve natural water sources for future generations.
- To eliminate plastic waste with glass bottles and PLA solutions.
- To provide health benefits by providing pure drinking water.
- Better and faster hydronation through low TDS.
- Lowered greenhouse emissions by reduced transportation.
- Pure drinking water free of chemicals and micro-organisms.
- Reduce water scarcity.
- Improve the taste of tea with pure drinking water.
- Preserve the natural taste of food.

HEALTH BENEFITS Pure Drinking Water From The Air

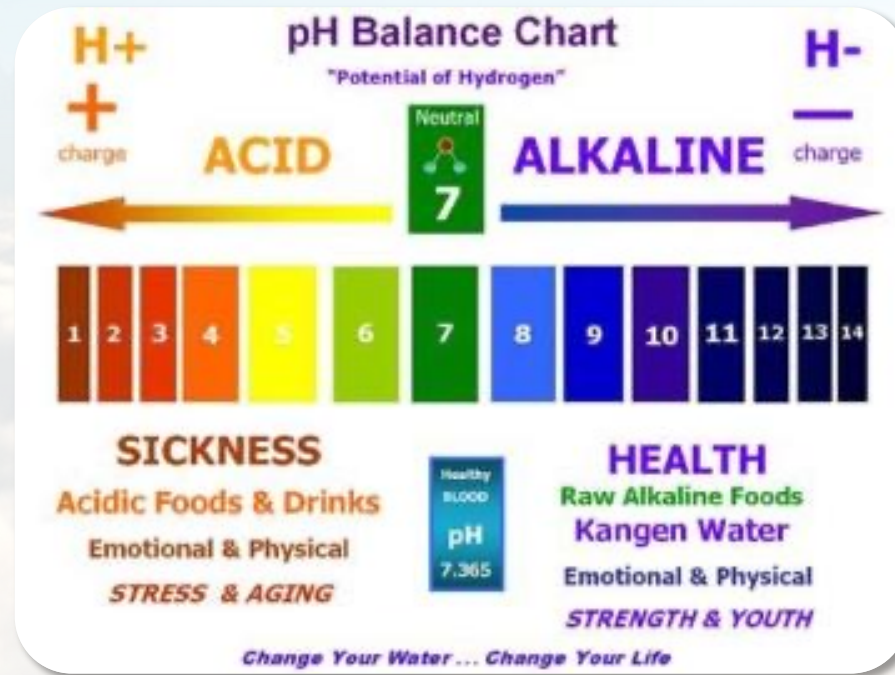

- PH at or above 8.0 is **ALKALINE IS GOOD!** => AERIS2AQUA = 9.1 !!
- TDS: 000~010 ppm => **Hydrates better and faster!** => AERIS2AQUA < 006 ppm !!

Helps to neutralize body acidity by balancing the pH levels in the blood

Removes acidic minerals to create a more alkaline water base

Prevents and treats degenerative diseases of the body

Slows down the aging process by reducing the amount of free radical damage

Prevents disease by lowering the acidic state of your body

Hydrates the body better and faster than conventional bottled and tap water

16 Surprising **BENEFITS** Drinking Pure Water From The AIR

- Water for drinking: Alkaline water from the air for drinking has a higher pH level than regular drinking water. The pH scale runs from 0 to 14, with 0 being the most acidic and 14 being the most alkaline. A neutral pH level is usually close to 7.4. Without a proper pH level, you may experience fatigue, breathlessness, muscle pain, and other symptoms.
- Free of contaminants: Water from the air with special filtration avoid contaminants such as sediment, chlorine, chloramines, and heavy metals from your unique source water.
- Anti-aging properties: Alkaline water from the air effectively neutralizes the harmful oxidants, or free radicals, responsible for cellular decay and early aging, reducing oxidative damage done to DNA strands.
- Energy Boosting: Adequate hydration is key to feeling energetic, but knowing that alkaline water from the air is boosting your energy at a cellular level will provide more of a spring in your step.
