Who are we and what do we do?

always looking for solutions to packaging problems

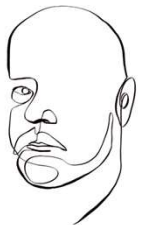

- Our team consists of 4 people (NL, D, UK) with more than 100 years of experience in the packaging world
- We develop new packaging and technologies; know-how and intellectual property is licensed. We develop both generic as custom made packaging solutions for food, drinks and non-food
- Knowledge of recycling and we make our own LCAs
- Experts in paper, plastics, films and coatings; in folding carton, injection moulding, thermoforming, molded fibre, printing technology and film extrusion

A TOP operates independently, and we are not tied to a choice of materials

We are at the forefront of packaging solutions ready for the circular economy.

Home delivery range

Unique, sustainable and circular packaging made of rPAPER™ with an easily removable thin layer of paper on the inside. After removal, the box can be disposed of as waste paper. The thin layer of paper makes the packaging leakproof and has a separate sauce compartment. The box has a good insulation value and an option for ventilation.

Available in 4 sizes: 800 ml, 1000 ml, 1600 ml and 2000 ml

SUSTAINABLE & CIRCULAR
PACKAGING INNOVATIONS
