

Philippe BECOULET / CEO

# How to reduce carbon footprint of daily car traffic ?

- understand mutations
- adapt infrastructures
- build win-win synergies
- rethinking public policies
- provide appropriate solutions

A major challenge for communities that need to learn how to overcome the government's traditional silo operations.

# Since a few years, electric mobility makes its rEVolution

*Many cities in France have already joined the virtuous circle.*

*Their commitment takes many forms:*

- **Deployment of charging station networks in the territories**
- **Acquisition of electric vehicles**
- **Development of public transport solutions**
- **Implementation of car-sharing and carpooling services**

Environmental issues, including air pollution, need to go faster.

# Get the appropriate mobility solution for everyone

To develop the  
attractiveness  
of your  
territory

24h/24, Safely

So that everyone can move freely

Make the choice of an innovative solution

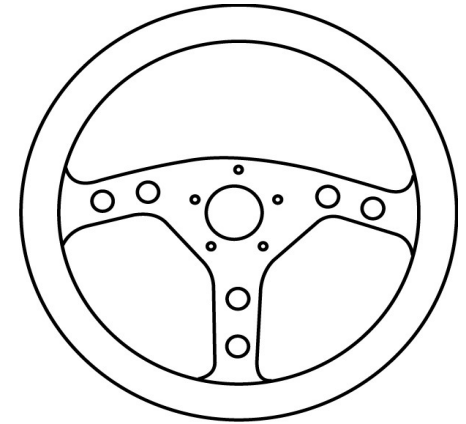

Reduce carbon footprint of daily car traffic

In direct trace or in loop  
according to your place  
of residence

*« bring innovations and services that simplify life every day, for every citizen. »*

## Rent your car in self service !
