Eco-friendly

No emissions contributing to climate change. No noise pollution or bad smell disturbing wild fauna and passengers. No oil leaks responsible for aquatic habitat degradation. The Aquanima allows you to sail in harmony with Nature, to be marveled at Her wonders without leaving any mark in your wake.

Comfort

The vast deck area and its simple, zen-inspired, layout invite you to lounge and indulge in the beauty of the natural landscapes and the tranquility of a completely silent craft. The deck arrangement is modular and customizable to meet your needs.

Safety

No fuel onboard means no fire and explosion hazards. The propulsion system operates in low voltage rendering it safer than a regular home electrical installation.

Maintenance & Reliability

The solar electric technology and the design concept of the Aquanima make them virtually maintenance and operation costfree. Electrical propulsion involves far less parts in motion than conventional combustion engines, rendering this technology incomparably more reliable and less prone to unpredictable breakdowns. The electric motors are designed for 10,000 running hours without maintenance and the energy system is designed for 25 years operation.

Cost-efficiency & Convenience

Fuel costs and logistics, maintenance expenditures and down time, let all these burdens belong to the past. Sun power is free Sail the Aquanima every day - for free, your tanks will always be full!

Offer a Unique Ecological Experience

Eco-conscious clientele will see your Aquanima as a premium and reward resorts who are truly committed to their ecological values.

Glide silently on the water, be One with Nature...
