OPEN : WHO ARE WE?

OPEN : **O**rganisation **P**our l'**E**au et la **N**ature

Non-Profit Organisation

Two Goals:

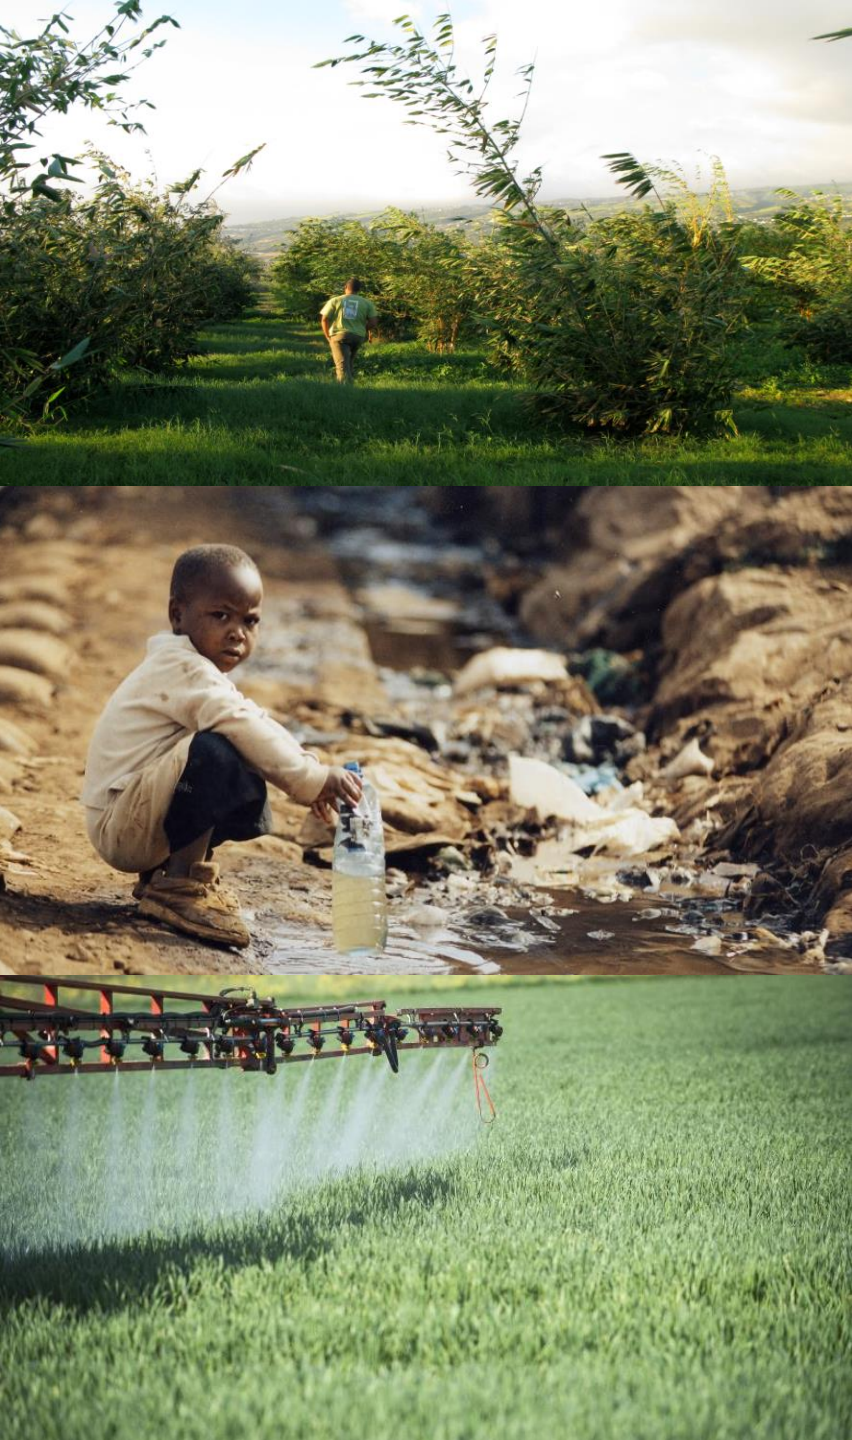

- **Promote** access to sanitation by carrying out projects that focus on the **treatment of wastewater and the protection of natural environments**
- **Contribute**, in France and abroad, to a goal of general interest of a humanitarian, environmental, health and / or scientific nature, **to the development of solutions including the preservation of water and nature**

OPEN : PURPOSE

The objectives of OPEN are multiple:

- Allow **access to sanitation** for disadvantaged populations
- Fight against **global warming**
- Sequestering **carbon**
- Producing **valuable biomass**
- Promote **reforestation and biodiversity**
- Protect the **water resource**
- Manage and recover **waste**
- Guarantee access to **water and sanitation for all**, UN commitment, SDG 6, **fundamental human rights**
- **Raise awareness** among global players on the issue of wastewater

OPEN: OUR ADDED VALUE

OPEN :

- Set up a **wastewater treatment plant** which is an advantageous alternative to the conventional treatment plant
- Graciously uses an innovative technology, respectful of ecosystems: **Bambou-Assainissement®** which uses bamboo for its role in purifying wastewater. This technology is **adaptable** to all climates, to all soils, is energy efficient, guarantees **zero sewage sludge** and **zero discharge** into the natural environment
- Achieves the final result: the wastewater is **sanitized** and OPEN participates in the population public health program and the **preservation of sensitive natural environments**

OPEN takes care of the **administrative, technical, social and financial** aspects of the project

SOLIDARITY VISION

YES, WE CAN CHANGE THE WORLD

plantation

OPEN works for well-being
populations

Objective: Facilitate access to sanitation

- Find **grants**
- Establish **wastewater treatment plants**
- **Administratively and technically** manage files

MECENES AND DONORS

By making a donation to OPEN, you will

- Contribute to UN law of **access to water** and **sanitation**
- Promote **access to sanitary water** in developing countries
- Act on **reducing water-related** diseases and mortality
- Allow the establishment of **treatment plants** in disadvantaged areas
- Finance the creation of an indispensable **biodiversity**
- Participate in the **greening** of an area by creating a **green lung**
- Join a **sustainable development** project
- **Gain impact** by associating yourself with a **public health operation**
- **Communicate** about your **environmental commitment**
- Pass from the polluter-payer to the **polluter-actor**
- Enjoy a **carbon credit** actually sequestered by bamboos
- Take benefit from an **interesting tax system**
