

## WHY BINEE?

### Transparency

binee's vision is a transparent recycling process. That is why we tell you where your device goes to.

### Circularizing the Circular Economy

By enabling reuse and recycling of valuable materials that are hidden in our urban mine, we can close the life cycle of electronics. This is how we support the effective use of resources and to make recycled materials available for producers.

### Urban Mining

binee enables the use of secondary materials from used devices by working with the best recyclers.
