Technological consulting in R&D&i projects

BIOAZUL offers its clients the appropriate tools to **turn their competitive ideas into a reality** by providing access to funding programmes like Horizon 2020 (H2020). BIOAZUL accompanies its clients from the formulation of the idea right up to the submission of proposals to national and international programmes. A **road map proposal** could well include the following:

Projects R&D&i

- **Analysis, formulation and development** of the R&D and innovation idea
- **Search for calls and funding** at a national and international level
- **Preparation of the R&D and innovation proposal**, including tasks like searching for technology and business partners, setting objectives and drawing up the work programme and budget.
- **Negotiation** of the project contract **and Submission** to a funding entity
- **Advising in the management** of the R&D&i project during the time it is being carried out.

Trajectory

Since it was set up in 2003, **BIOAZUL** has positioned itself as a **significant player in technology consulting** for international collaboration R&D and innovation projects in southern Europe.

BIOAZUL has achieved ranking as the **top private Andalusian organisation** with the greatest economic return in FP7, and second in the overall ranking. Our **wide experience** in the preparation, participation and management of R&D&i projects could be summarized as follows:

- 4 projects within the **Horizon 2020 Programme**, being the general coordinator of 1 project and the administrative coordinator of another one
- 16 projects within the **7th Framework Programme**, being the general coordinator and the administrative coordinator of 2 and 4 of them respectively
- 14 projects within the **6th Framework Programme**, being the administrative coordinator of 8 of them
- 3 projects of the **Executive Agency of Competitiveness and Innovation (EACI)**, framed within the **Eco-Innovation Programme**, being the general coordinator, and the **Intelligent Energy - Europe (IEE)**, being the general coordinator of one of them and the administrative coordinator of the other

Fields of competence

 We cover the following thematic areas of applied R&D&i:

- Integrated Water Management
- Agriculture
- Food industry
- Green energy
- Ecological sanitation
- Integrated Waste Management
- Urban Sustainability
- Environment & Climate change

 We carry out **training activities** for our clients and collaborators, which include **public** (universities, research centres and administrations) **and private entities** (companies, private technology centres and professional associations):

- **Tailor-made** training activities on international funding and management for R&D and innovation programmes
- **Consultancy** and training related to the strategy of capitalising on project outcomes, the intellectual property of said outcomes, plans for their use, internal and external risks associated with the project, contingency plans, etc

Support and guidance

We guide you in your R&D&i project planning process:

Advantages of participating:

- **Performing actions** which would otherwise be impossible to carry out solely with the organisation's own resources
- Opening up of new markets through the marketable projects outcomes
- **Boosting the organisation's visibility** and the creation or widening of a **strategic network of contacts** with Spanish and international partners
- **Acquisition of scientific and technical know-how**
- Enriching experience linked to collaborating with **top-quality world-renowned organisations** involved in R&D and innovation
