

Secure your ebike fleets
and enjoy your growth ride

Bring intelligence to your ebikes

Introducing the connected brain for your ebikes: the eBikeLabs vehicle controller

Invisible Anti Theft

Inseparable electronic motor locking systems lock the wheel of your ebikes using the motor itself. By activating the lock using the app, riders turn their ebikes into non functional vehicles.

- › **Maximize security:** the only way to bypass the lock is to destroy the motor
- › **Don't rely on battery:** the lock works even with empty battery
- › **Prevent parts theft:** battery and vehicle controller are paired, making it impossible for them to work separately
- › **Surprise thieves:** alarm and security lights activate in case of unauthorized use

And much more!

**Protect
Capital
Investment**

Take full control over your fleets

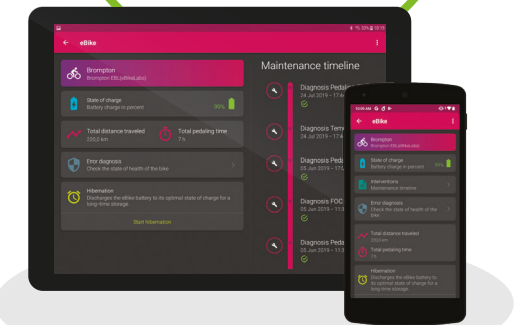

The vehicle controller opens unprecedented edge-computing capabilities

Minimized Maintenance

Makes it easier than ever to take care of each ebike of the fleet.

- › **Predict** failures before they can occur
- › **Cure** them using 1 min complete remote diagnostic with step-by-step guide
- › **Prevent** parts from excessive wear
- › **Do nothing and save:**
Replace hardware components with algorithms: pedaling torque, odometer, motor position, temperature...

**Reduce
Operational
Costs**

**Increase
Customer
Loyalty**

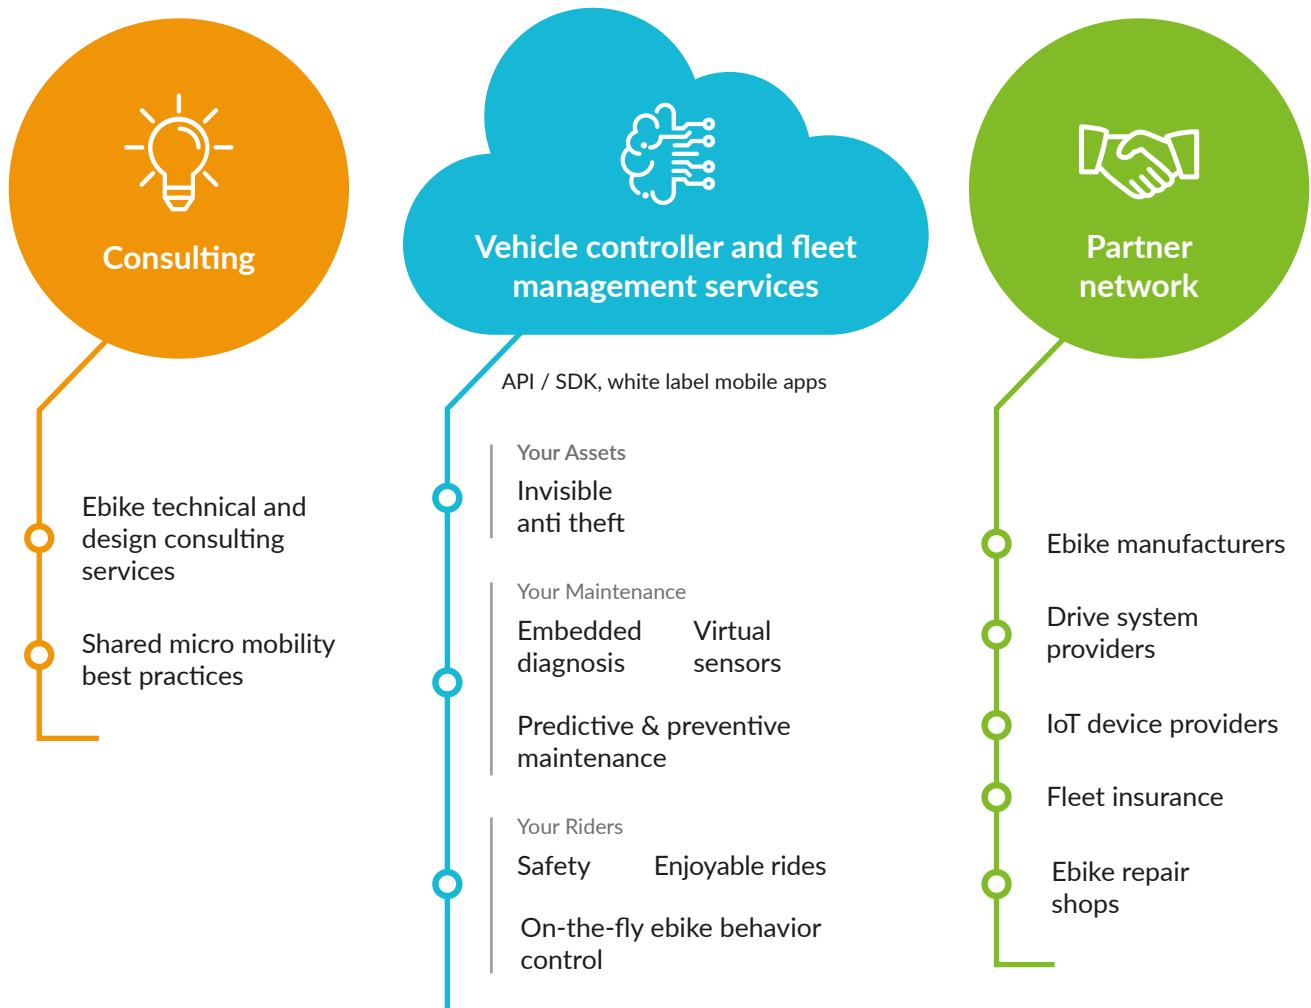

Safe and Enjoyable Rides

Safety technologies allow to keep your riders safe and happy.

- › **Remotely set** acceleration restrictions
- › **Prevent** riders from reaching excessive speed
- › **Ensure** smooth and progressive riding experience

eBikeLabs plug-and-play platform

Complete solution when launching from scratch or custom tailored products and services to enhance your ebike sharing fleet

Why partner with us:

- > Fast time to market
- > Easy integration
- > Patented technology
- > Compliance with EU LEV regulations
- > Guaranteed ongoing support and maintenance

About eBikeLabs

eBikeLabs was built with a mission to accelerate the adoption of electrical bicycles into cities.

Because we believe that ebikes are the best answer to mobility demands - they are fast, for everyone, they fit city infrastructure, good for environment and health.

At eBikeLabs we remain committed to our mission by helping mobility operators to deploy large ebike fleets into cities all around the world.
