ABOUT *US*

IRRESISTIBLE BOATING

IRRESISTIBLE

BOATING

PIONEERING

Evoy leads the way into uncharted waters, discovering and exploring, attentively navigating around obstacles, to open new routes for an irresistible boating experience. Being pioneering is demanding, but also extremely rewarding to those involved and those who follow in the wake.

POWERFUL

To accelerate the green shift at sea, we need solutions that take big steps forward. We are driven by the will to do good that lives inside all of us. We shape solutions that are powerful enough to make change happen – and proceed full throttle!

RESPONSIVE

We intend to change an entire industry. The boat market is changing rapidly, and we need to be responsive to succeed and ready to alter course frequently. Fitting into common plans with the marketplace.

GENUINE

We believe in making a real impact, by eliminating fossil fuel at sea. To make real changes, we also must be genuine – by being honest, fact based and transparent.

MORE THAN A VISION A *MISSION*

EXPLORING WHILE BEEING AWARE

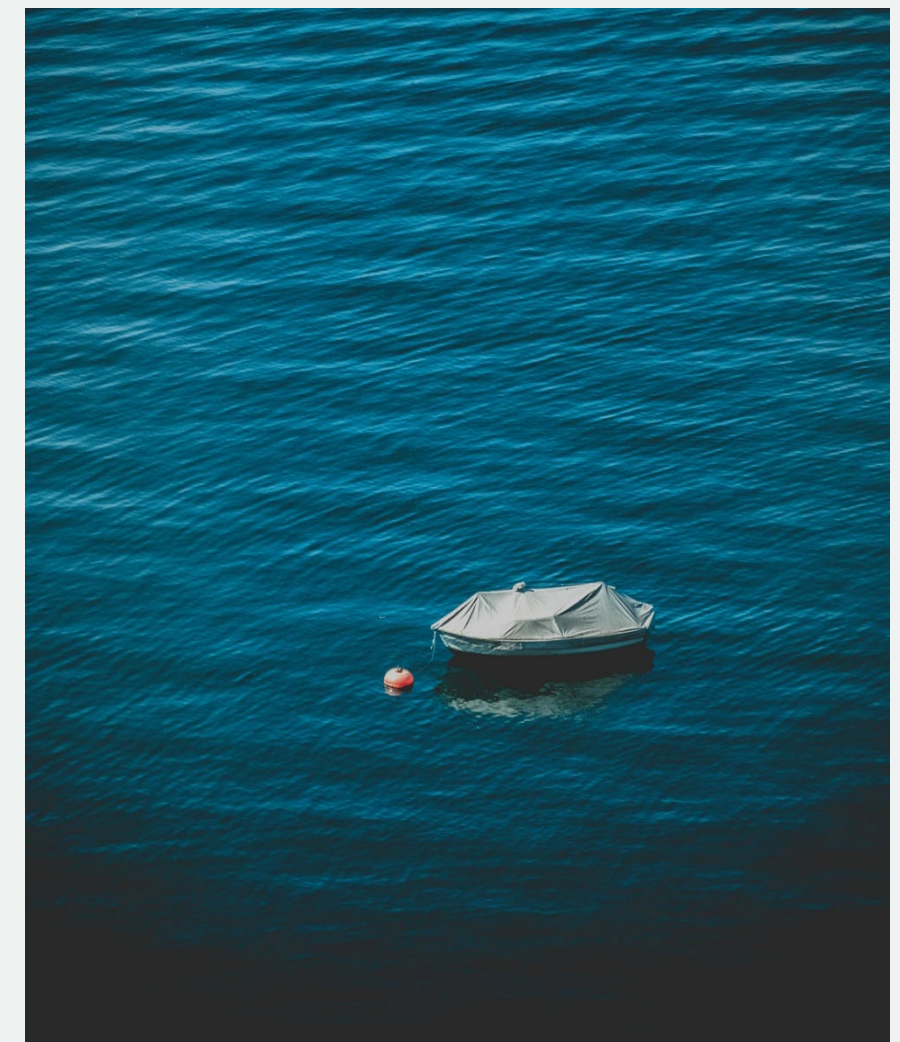

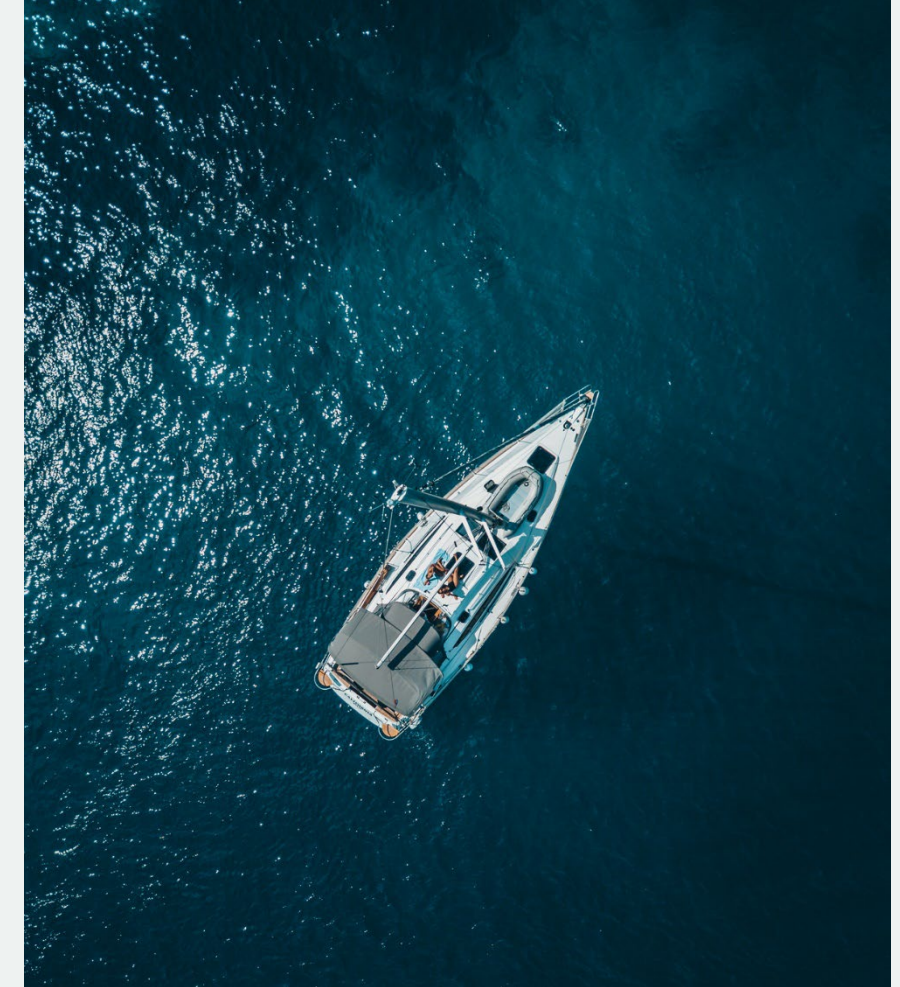

- Maritime transport is the 3rd source of pollution of these ecosystems, via fuel combustion, waste release and noise emission,
- Hydrocarbon releases and other substances
- Oily and bilge water: unburnt or incompletely burnt fuel, particulates and traces of oil are released into the environment. If, globally, the quantity of these pollutants is small, they might accumulate locally, especially when boats are stationary, which results in an oil film on the surrounding water.
- Noise disturbance: in accordance with standards, the authorized level of noise emitted by new engines has been limited since 2006. However, when operated at speed close to the shore, engine noise is perceived as a nuisance in sensitive areas such as beaches or natural protected areas.
- Depletion in fish stocks: the authors note that compared to overexploitation and illegal, unregulated and unreported commercial fishing, recreational fishing activities have no significant impact on fish stocks.

Our *REVOLUTION*

EXPLORING AND FEEL RESPONSIBLE

- 1 system from Evoy typically cuts 50 tons CO₂ annually,
- No Noise pollution
- No oil loss
- Zero-emission performance
- Reduced maintenance costs
- Low-noise & High safety

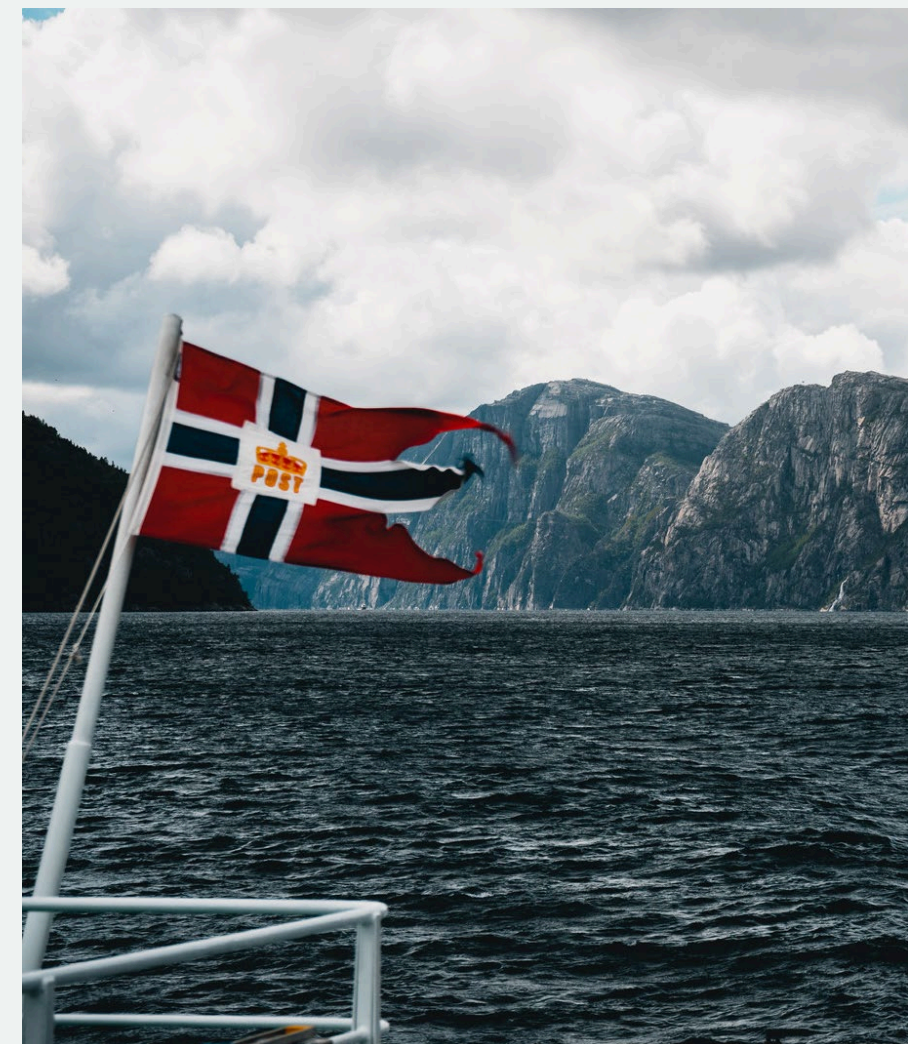

EVOY *REVOLUTION*

OUR COMPETITION

- Low speed
- Low range
- Low ROI
- Long charging
- Low driving experience

US

- **World's fastest** motors,
- **World's first boat** DC supercharger,
- **World's smartest** e-boat system
- **Zero-emission** performance
- **Reduced maintenance** costs
- Low-noise & High safety
- Longer ranges
- **Made in Norway**
- Existing and commercialized solutions

UNIQUENESS

STRONG R&D

- Own our products with Off-The-Shelf components,
- Customer UXUI
- E-Boating, predictive maintenance fleet management,
- Over the Air Software updates

LEADERSHIP

- Our team,
- Board of investors
- Board of Advisors
- Their passion drives our success.

HONESTY

- About our products capacities,
- Production
- Plans
- Customers success

MISSION

- Standardise and build volume,
- Build a strong partner echosystem
- Help build the futur infrastrukturs (charging docks, standardization,,,),

150

WORLD LEADING E.OUTBOARD

Plug-and-play feature for ease of instalment. Evoy’s high-output electric outboard system is powerful beyond expectation with **full torque from zero rpm**. Be ready to turn heads on the water with this fantastic looking powertrain!

TECHNICAL INFO PEAK			
PRO	Peak 200 HP/350 Nm	Medium 120 HP/	
	+50 Knots	55nm - 102 km 25 knots - 1400kg - 90 kW	Fast charging 150 kW (under 30 mn)
	Perfect Cost of ownership	Most advanced Software in the industry with OTA (Over-The-Air)	Excellent ROI

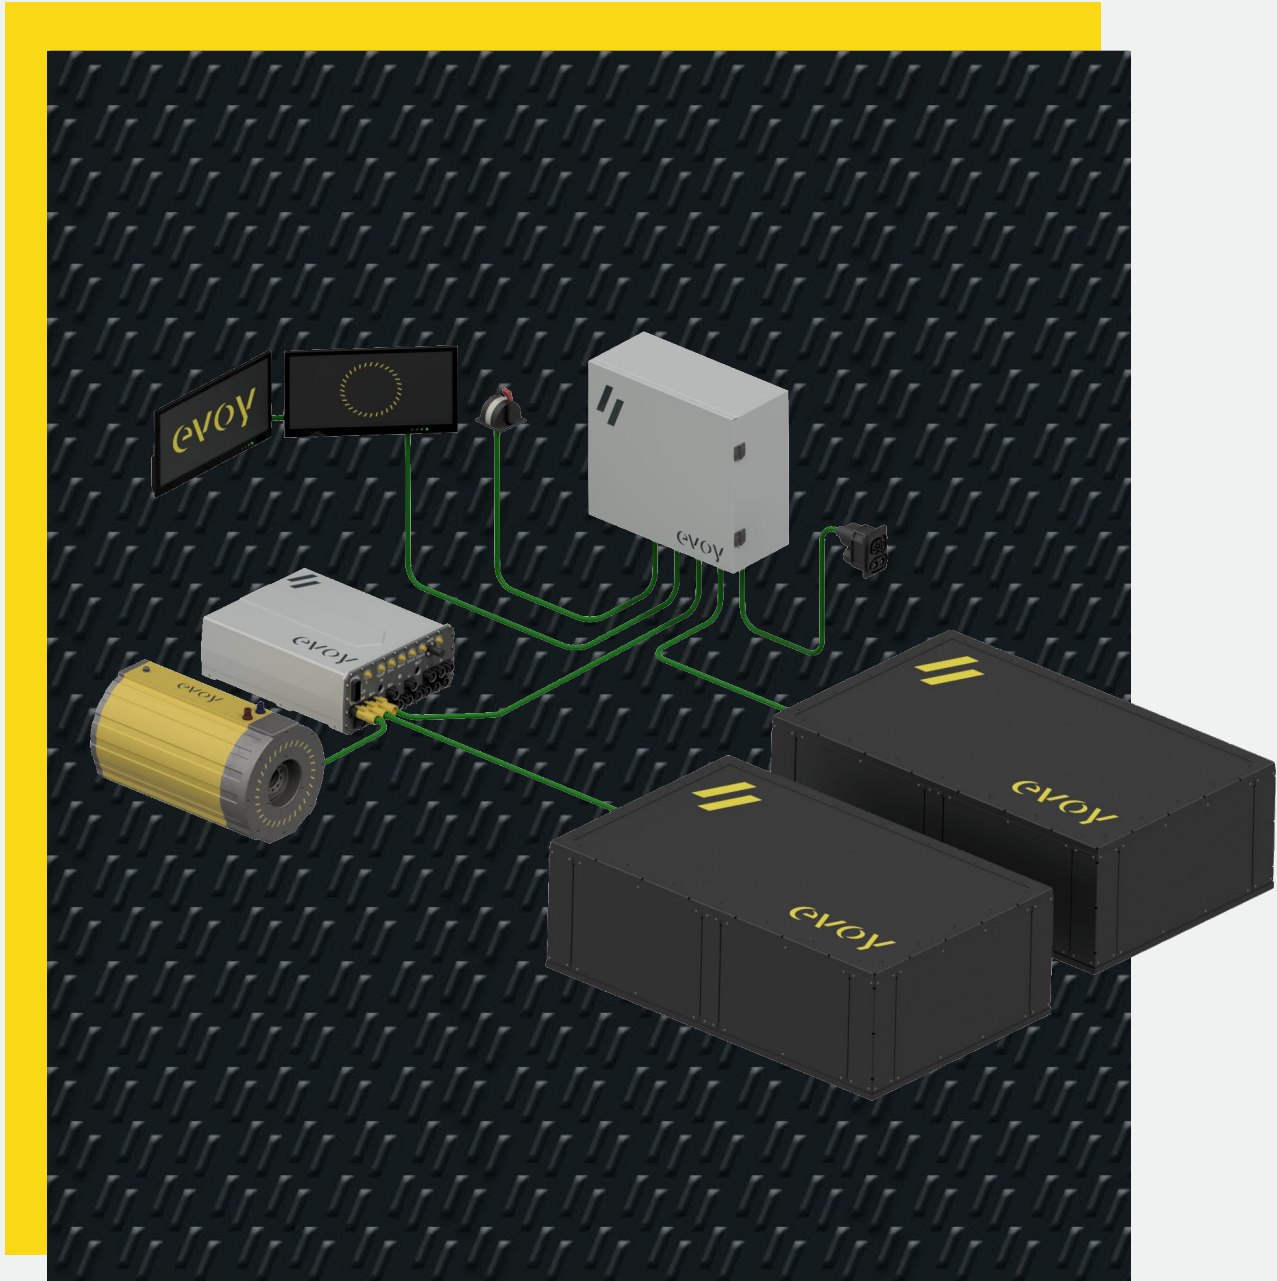

800 HP

800 VDC

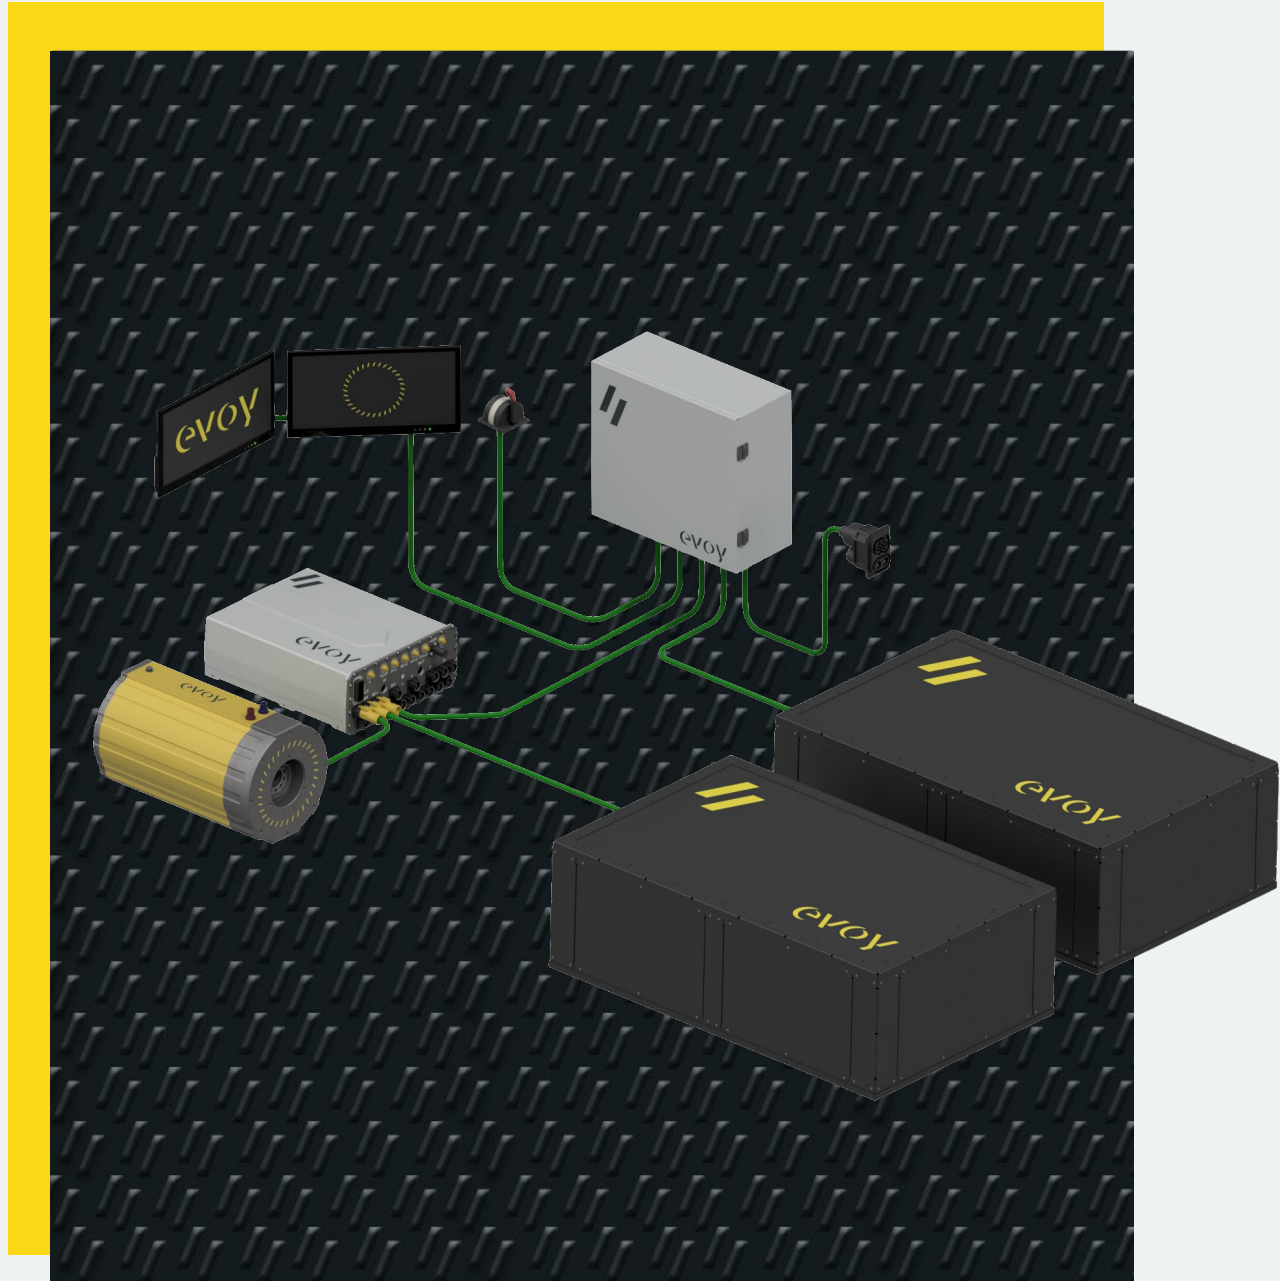

High-Output 100% Electric propulsion

Evoy’s electric inboard motor system is best suited for fast boats from **20 to 50ft.** This robust system offers up to 800Hp, +50nm range and **+50 knots speed!** All that with close to **zero CO2 emissions** and **less noise.**

TECHNICAL INFO			
PEAK			
PRO	800 HP/1500 Nm	400 HP/770 Nm	1000 Hrs/ years
	+50 Knots	High Range 200nm (400km) in slow speed	Fast charging 300 kW (under 30 mn)
	Perfect Cost of ownership	Most advanced Software in the industry with OTA (Over-The-Air)	Excellent ROI

400 HP

450 VDC

High-Output 100% Electric propulsion

Evoy’s electric inboard motor system is best suited for fast boats from **20 to 50ft.** This robust system offers up to 800Hp, +50nm range and **+50 knots speed!** All that with close to **zero CO2 emissions** and **less noise.**

ELECTRIC MOTORS

- High-Output → Very cost effective compared to ICE
- Handful of moving parts
- Manhour intensive to make
- Massive R&D around the world
- Last Priority to produce

CHARGER AC/DC

- Hard to find suppliers
- High price
- Little flexibility
- «Low complexity»
- «Must have»
- First priority to produce

ELECTRIC MOTORS

- High-Output → Very cost effective compared to ICE
- Handful of moving parts
