

# Our Story

The story of Vigor Aqua starts in the 21st Century. Deeply rooted in the beautiful, small, and peaceful rural town of Kawambwa in Zambia Africa. Vigor Aqua is inspired by the curiosity of a young mind unafraid to challenge the unknown and a vision of a world free of mental and material poverty. It is founded on the belief that hope can inspire self-determination to achieve the impossible, and that those who have the courage to believe in themselves and others can change the world.

Vigor Aqua is one of many roads on a journey of saving one life lost to waterborne diseases such as diarrhoea, cholera and pathogens causing Cryptosporidium. Making water safe for drinking, cleaning teeth, and washing fruits and vegetables. Giving people physical strength and good health. And promoting vitality.

**WE SHOULD USE IT.**
