

## Products

### H2Omni-X

First commercially-ready USV from H2O Robotics, already delivered dozens of times to worldwide partners and clients, giving them versatility and latest technology in a single vehicle.

## Services

- Vehicle leasing and project operations
- System integration and consulting
- Research and development

## About

Founded in 2017 in Zagreb, Croatia.

Spin-off from University of Zagreb, Faculty of Electrical Engineering and Computing from the Laboratory for Underwater Systems and Technologies.

Result of more than 15 years of experience in marine system and technologies.

Offering products and systems for commercial and scientific applications.

## Mission

To offer innovative and cutting – edge solutions in the world of marine robotics. Making an impact both on the commercial and societal community with products and services. Contribute to the scientific society with research and innovation.

## Vision

Assist all communities in better and safer investigation of underwater world and its hidden wonders using advanced robotic solutions. Improve all ocean related activities, both underwater and above the water.
