ABOUT US

Instant Energy is a cleantech company registered in both Nigeria and the Netherlands, with CAC RC NUMBER 1559339 for the Nigerian Entity and KVK Number 73870927 for the Dutch entity.

At Instant Energy, we make Energy accessible and affordable in emerging, underserved markets across Nigeria and Africa by providing energy as a service platform and also facilitating access to clean renewable energy for residential and commercial clusters.

We seek to catalyze energy access partnerships by leveraging grants, concessionary finance from governments and mobilizing private sector investors interested in investing in energy assets.

WHAT WE DO

An aerial photograph of a large-scale solar power plant under construction. The image shows several long, parallel rows of solar panels laid out on a flat, gravel-covered ground. To the right of the panels, there are numerous white electrical cabinets and equipment. In the background, a yellow crane is visible, and a large white building with a corrugated metal roof is partially seen. The scene is set in an open, industrial area.

We work with on and off-grid power providers to provide a robust electricity billing platform that takes care of bill collection, real-time energy monitoring and easy connection of every single individual household and business to clean energy through our mobile and web app.

This service aims to provide a reliable power supply, reduce the dependence on fossil fuels and promote a more sustainable and clean environment.

This will translates to massive cost reduction on the amount currently being spent in Nigeria on diesel generators as an alternative to the grid.

OUR CULTURE

CORE VALUE

- Think green
- Integrity
- Learn fast, innovate faster
- Innovate through experimentation

VISION

To be the most innovative energy as a service platform across Africa.

MISSION

- To make energy accessible and affordable across Africa.
- To provide an impact-driven technology to our customers

OUR PRODUCT

Energy as a service for everyday use.

Products

IE-PAY

A convenient way to buy electricity online, get visibility on your energy spending and usage.

IE-SOLAR

An easy way to request solar for residential and business use, with access to flexible payment plans.

IE-COLLECT

More visibility and control for facility owners, on and off-grid power providers through our robust dashboard.

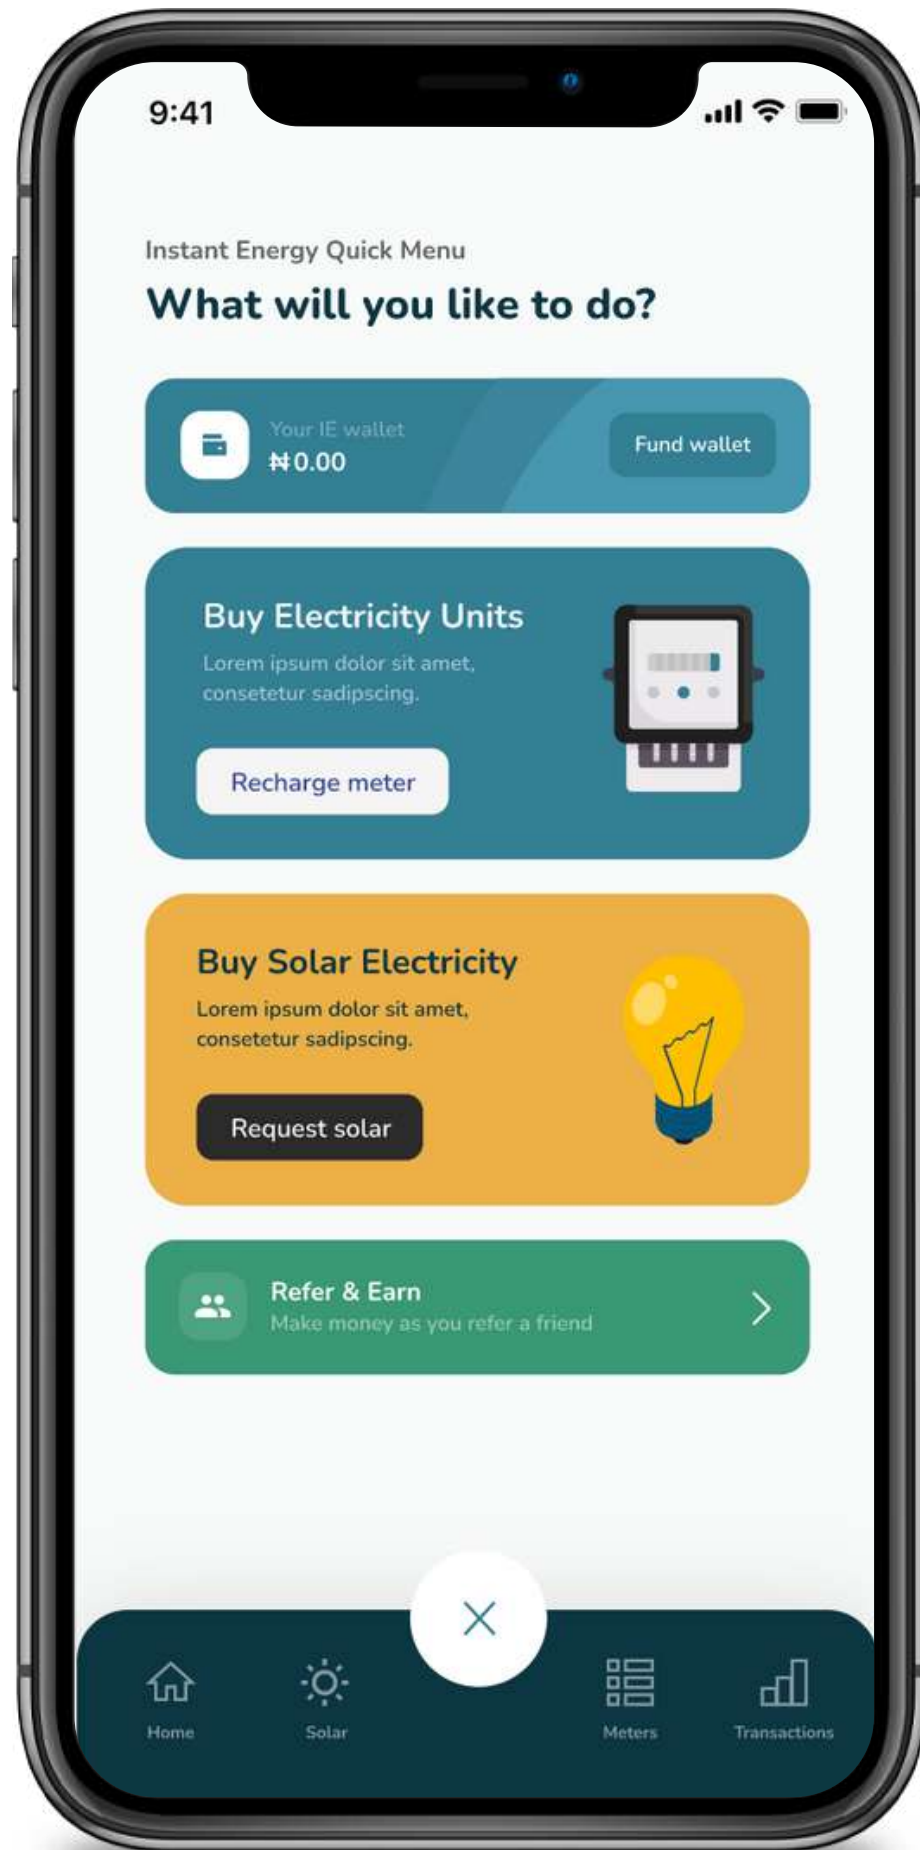

OUR SERVICE

We operate through two segments:

First is web and mobile application, where we enable on-and off-grid energy providers to maximize payment collection from customers by providing an intelligent and robust payment platform and a real time management dashboard to improve energy access efficacy.

Second, we facilitate access clean renewable energy using a solar home system or a decentralised micro-grid system to enable residential and business clusters across Nigeria connect and share energy provided through solar and battery storage.

EASY TO USE

Multiple Payment Options

- Pay with card
- Pay with bank
- USSD for offline payment
- QR Code
- Agent network
- Instant Wallet
- Buy now, pay later

GREEN IS ALWAYS BETTER

Facilitating access to Renewable Energy

We are reducing our carbon footprint and making the environment healthier and greener one household at a time, one business at a time.
