

this year
667 million
bags of
paddy
won't
make it
from field
to fork

Globally, 500 million smallholders produce 80% of human food. Many grow cereals including rice. Millions live daily with food and fuel poverty. For 3.5 billion people today (6 billion by 2050) rice is literally life.

Rice processing is an antiquated global industry locked into a wasteful embedded culture driven by vested commercial interest.

Imagine a world with a rebalanced value chain, enabling smallholders to transition from commodity to market leading, value added producers.

Contributing to 16 of the 17 SDG's, food security, sustainability and poverty alleviation, Koolmill's agri-tech solution offers increased incomes, employment and health.

What does Koolmill make?

We make a better world.
