

**BRINGING PERFORMANCE
TO WASTE MANAGEMENT**

RECYCLING ISN'T EFFICIENT

**WASTE COLLECTION
IS UNCONTROLLED**

**>50% OF COLLECTED BINS
CONTAIN CONTAMINANTS**

**WASTE SORTING IS
INEFFICIENT**

**UP TO 50% OF INCOMING WASTE
ISN'T RECYCLED**

**WASTE RECYCLING IS
UNCOMPETITIVE**

**OVER 20% OF INCOMING WASTE
IS BELOW QUALITY**

**WASTE COLLECTION

**WASTE MANAGEMENT COMPANIES
HAVE A PERFORMANCE & MONITORING PROBLEM**

OUR ANSWER :

A PERFORMANCE OPTIMISATION SOLUTION FOR THE WASTE MANAGEMENT INDUSTRY

IT'S AN ALL-IN-ONE SOLUTION

HARDWARE

+

AI

+

DASHBOARD

Image analysis devices
at the heart
of the plant

Waste characterization
on site, instantly

Data insights,
at the touch of a button

WE TESTED VARIOUS USE-CASES

WASTE COLLECTORS

Quality control

Real time mapping of waste collection

SORTING FACILITIES

Quality control

Identification of dangers (fire hazards, dangerous waste)

RECYCLERS / VALORISATION UNITS

Quality control

Recycling recipes validation

AND CONFIRMED OUR ADDED VALUE

OPERATIONAL EFFICIENCY

- Reduce costs of auditing
- Mitigate risks for workers and equipment
- Reduce landfill cost

COMMERCIAL IMPROVEMENT

- Improve volume and quality of materials
- Automate stakeholder information management

MARKET LEVEL TRACKING

- Provide EPR companies with real time and exhaustive data
- Reduce studies and auditing costs

THE ADDRESSED MARKET IS HUGE

Municipal waste
collection, sorting and
recycling market

110Bn€
4.3% CAGR

4Bn€
global market
for waste management monitoring
software solutions

WE CAN MAKE IT MUCH BIGGER

- ...
-  Energy valorisation
-  Recycling
-  Sorting
-  Collection

AND THERE IS A STRONG MARKET MOMENTUM

International game change

As of 2021, China stopped importing plastic waste, forcing Western countries to recycle locally

Political will

Western countries are imposing recycling objectives and increasing landfill taxes

Corporate investment

FMCG companies are investing to better manage the full life cycle of packagings and goods

IT'S JUST A START TO BUILT A CHAMPION

**Making Lixo
the go-to
software
for waste
management**

Consolidation

- Pilot projects across Europe
- 15 people
- Seed round

2020-2021

Scaling

- Rollout of SaaS model
- Integration with large scale service providers
- Machines integration
- Series A

2022-2023

Expansion

- Market expansion (uses washes, types of waste and geographies)
- Rollout of commercial network

2024-2025

OUR MANIFESTO

We strongly believe

tech can play a major role in fighting climate change
and **reducing humans' impact on our environment**

We also believe

tech startups should not be exempt from efforts to reduce their impact

We are dedicated

to **making Lixo a tool to increase overall recyclability and waste valorization,**
but also to **building a company based on responsibility :**
towards employees, suppliers, clients, and all other stakeholders.

**Lixo's development should not be done at the expense of people
nor natural resources.**

Social and environmental responsibility will be at the core of our strategy

AND HOW WE'LL MEASURE OUR IMPACT

Our impact will be calculated based on the **volume of waste recycled thanks to Lixo** (avoidance of landfill, reduction of incineration of recyclables)

12.5

By 2030, substantially reduce waste generation through prevention, reduction, recycling and reuse.

RECYCLING ISN'T EFFICIENT **YET**
