Competitive Advantage

MARKET OVERVIEW

NACHEM investments Limited operates as a formidable trader and contractor. We have developed long-standing relationships with our suppliers and pride ourselves on the service we provide. We routinely monitor all of our suppliers to ensure continuing compliance with standards, regulations and procedures. In many instances, we function as our suppliers' regulatory affairs representative. Our main customers have been Lubambe Mine, Chambeshi Copper Smelter, NFCA, Luanshya, and Kansanshi Mines including Zambia Electricity Supply Corporation (ZESCO).

The company has had to use all possible marketing and sales strategies conceivable in order to penetrate the aggressive market. In the business of supply, every supplier regardless of size is a competitor. In the contracting and engineering business, we will always remain steadfast as we rise to the challenge.

COMPETITION AND COMPETITIVE EDGE

The market NACHEM Limited operates in has stratified levels of competition depending on the perceived levels of risk, profitability and required investments and operating capital for each type of business. As this company is engaged in various types of business activities, it is faced with different types of competition and market risks.

Competitive edge

NACHEM Limited attains its competitive advantage over its competitors through a motivated performance-focused approach to doing business. Though the company is relatively new, its recognition has grown rapidly due to its efficiency and effectiveness in the delivery of goods and services to the customers. Proficiency, as exemplified by both field and station staff, is a company credit to derive pride from. NACHEM Limited believes in fair pricing to the customer.

The company's liquidity is unshakable despite the global financial crisis. It has borrowing facilities and capacities which it has not exploited yet. The asset base is more than enough to secure any financing for capital or operational financing for any term.
