

# UPCYCLINK

Biovalue Makers

## TURN WASTE INTO RESOURCES

### High recovery

Maximize the value of your residues at source through the production of high value marketable products.

### Tailor-made solutions

Benefit from in situ technologies tailored to your capabilities and target markets.

### Turnkey project

Make your project easier :  
remove complexity with turnkey and plug and play solutions.

# THE UPCYCLINK EXPERIENCE

We propose turnkey projects, from diagnostic to markets

1. We qualify your deposits quantitatively and qualitatively.
2. We identify potential markets and put you in contact with buyers.
3. We adapt your recovery processes and manufacture pre-series for market tests.
4. We scale and design the recovery unit and assist you in commissioning the unit.

## A WIDE RANGE OF APPLICATION

### Get products you are familiar with

Return food loss and waste into your food supply chain

### Get products to expand your range

Mince, Fish flesh and pulp  
Intermediate food products  
Feed & Petfood commodities

### Get new products for new markets

Proteins, Oil, Minerals  
Ingredients for feed, food & cosmetic  
Biofertilizers and biostimulants

“ *UPCYCLINK is a real added value to carry out our project of valorization of the co-products of the sea.*
