

Ultra-fresh shrimps,
sustainable and local

Aquaculture: a strategic area with strong growth driver

A fresh shrimp: a high added value and unique product in France

90% in Europe,
comes from South-East
Asia and Central America

Shrimp production

has a huge impact on the environment:

- Mangrove deforestation
- Massive antibiotics use
- Travel frozen for thousand miles

We offer a **unique product:**

- **Local**
- **Guaranteed with no freezing**
- **No antibiotics**

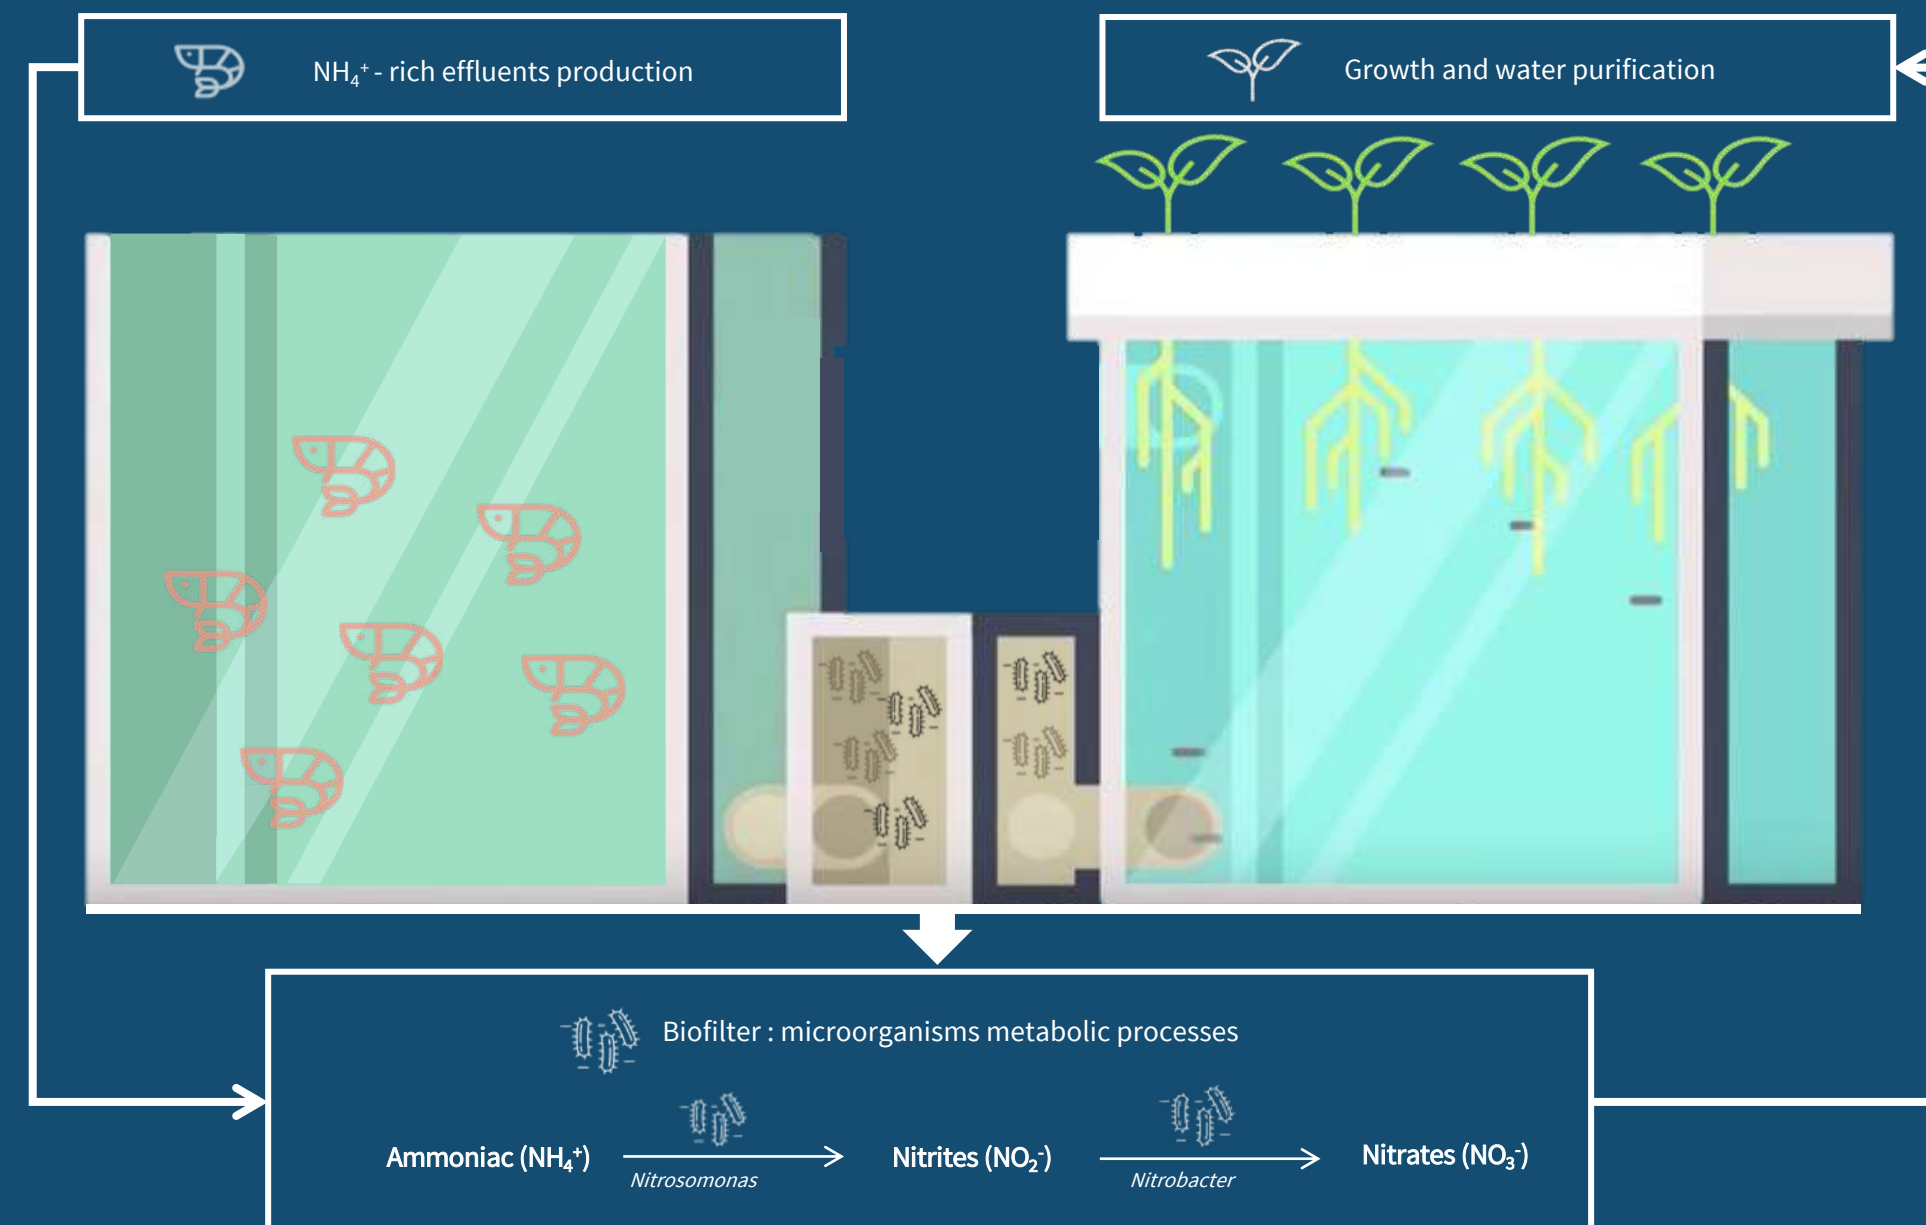

Our tool: a unique farm with saltwater aquaponics

Aquaponics:

Aqua^{culture}

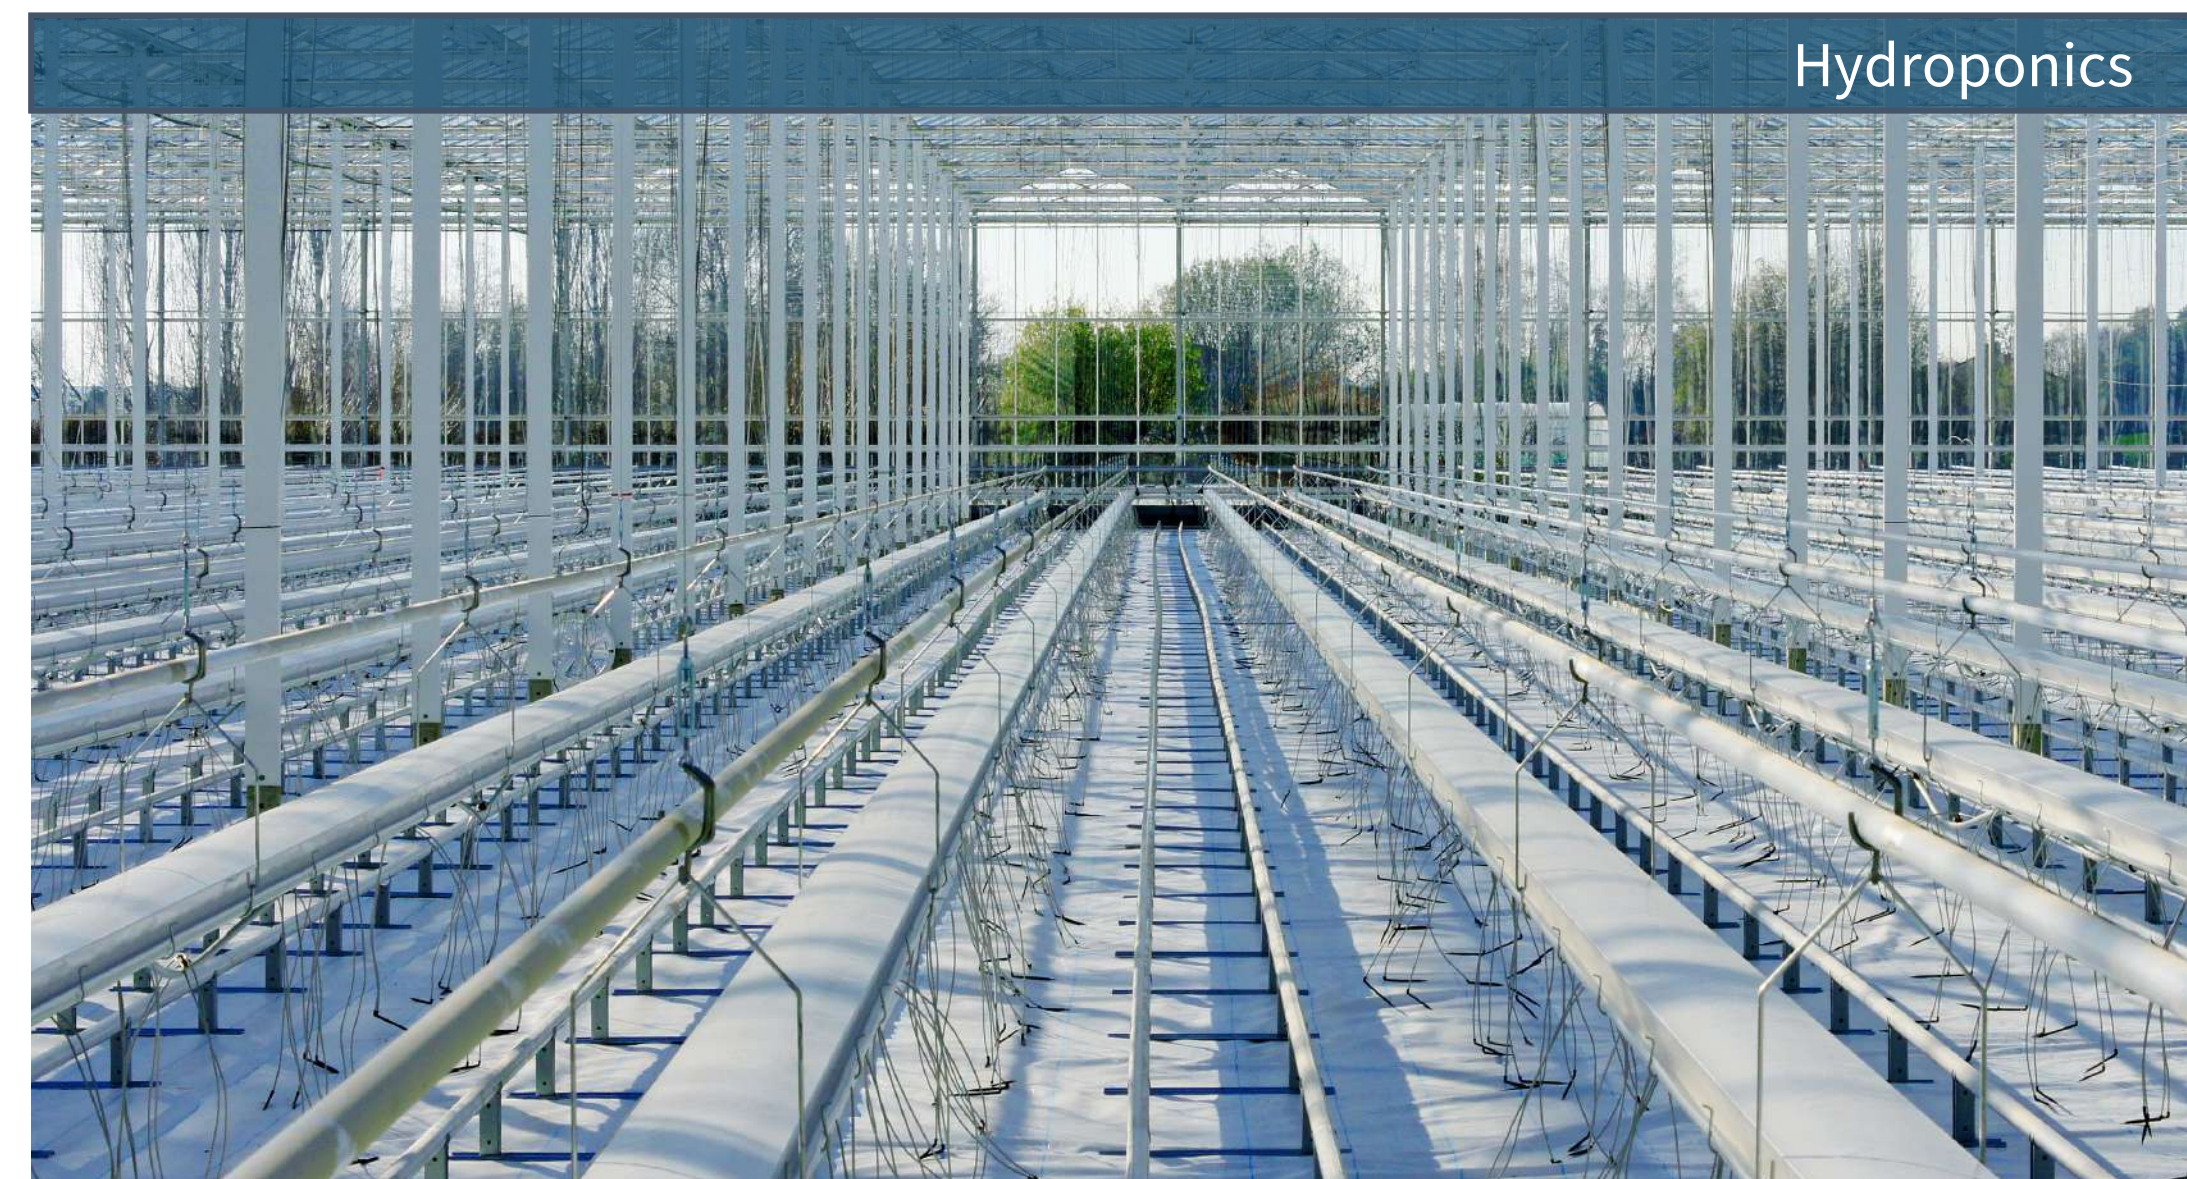

+

Hydro^{ponics}

Production based on circular economy:

- 95% of water saving
- Recycling polluting wastewater into natural fertilizer

Our tool: Why it is unique?

Saltwater aquaponics

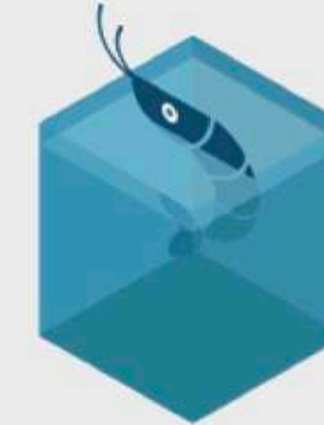

Developed for the 1st time in saltwater to produce high value marine species, such as shrimps

Barriers:

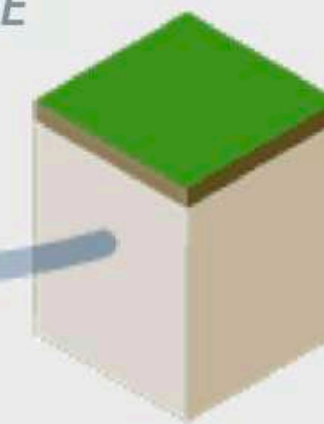

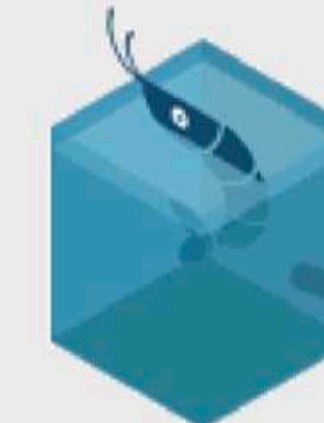

1. Development of a specific process
2. Development of a specific water formula
