Summary

In every commercial cooling system (e.g. fan coil units, air handling units, cold displays and cold storages), there will be a condensate drain pan for collection and drainage of condensate water.

This pan is prone to bacteria and mold growth as it is situated in a dark and damp environment. Build up of slime, as a result of bacteria growth, combined with the accumulation of dust and dirt, causes blockage of the drain hole, resulting in overflowing of condensate water from the system.

Since air is constantly carried across the drain pan, bacteria and mold spores is transferred into the air stream, causing allergies and health problems to the occupants of the room. The CDB™ prevents bacteria and mold growth in the drain pan, through the controlled release of cleaning and disinfecting agents into the condensate water. As a result, these microorganisms and their associated odors do not propagate and are not brought into the air stream. In addition, the CDB™ also prevents overflows of condensate water from the cooling system. We believe that our CDB shall suffice & that will deactivate the Legionella pneumophila as well.

Coil*Tech Coil Cleansing Spray: The most unique benefit of the Spray is that it obviates the need for a "Brought Down Service" that happens to be a norm in Airconditioning Service in India currently This revolutionary "No Rinse" product is formulated specifically for Indoor Air cleaning and the disinfecting of the evaporator coil of your Airconditioner, and the effects of which lasts upto three months after application (*Contingent on climatic conditions and usage)

Let Us Clear the Air!

Experience

Chief Executive Officer

Coil Tech

Feb 2015 - Present (7 years +)

Coil*Tech was founded in 2015 by an Ex- Carrier man, Gopal Banerjee, with a view to provide "Best in Class" air conditioning, maintenance and Aircon Service Products, imported from Thailand. After spending twelve years working for other air conditioning firms, he realised that while he had the knowledge, skill and experience to start his own small business; (Customers didnt know about caring, maintaining or looking after their A/C Units.) Now focusing on providing a personal service/ education to his customers, where every single person matters. He wants to provide the best possible advice, supply the best aircon service components, in the market, and impress his customers so much, that they will tell their friends about him! Thats the Story of Coil*Tech. Let Us Clear the Air!

Warmest Regards

Coil*Tech

Jan 2014 - Present (8 years 1 month +)

Coil*Tech Coil Cleansing Spray a convenient and affordable way to improve Indoor air quality, leading to Customer Satisfaction and Delight.

What to do About Mold in Mini-Splits?

A: Any space with organic dust and mold spores that has high humidity continuously for more than 24 hours, without several hours of dry time will start to grow mold. It's tricky to stop mold from growing.

Most people aren't sensitive to mold, however there are some who become ill from gases that mold growth produces.

Managing Director

Cambindia Biotech

1984 - 2008 (25 years)

Job description (including key achievements)

Sales of kits for the detection of HIV, HbsAg, HCV Rapid and ELISA tests to the National AIDS Control Organisation, and State AIDS Control Societies, NGOs, and private hospitals

What wonderful feedback!! - The Taj Mahal Palace Hotel, Mumbai

May 2015

Dear Mr. Banerjee,

The following is the feedback received from the concerned departments :

The De-ionizer is good but cannot be used as we do not have our own car fleet. We will suggest this to our service provider when we finalise on the contract.

The spray is good but the hotel is already using a substitute product contracted by Central Material's Group.

Kindest Regards

Anthony D'souza
