Ecopots- Organic waste composter& plant grower

Large waste part-easy to dump wastes!

Super roots to waste part & fast composting

- Larger organic waste volume
- Easy to pour wastes & cover with soil for an insect free seal
- You can add earthworms,
- Easy root growth into waste part
- Faster, smell free composting
- low cost, labour, time, space!
- Good for a global mission
- 7 liters waste+plant 3 liters/pot.
- Cost: low.
- Indoor with LED light/ outdoor use-vegetables from veg/non veg organic wastes garbage gardens!

How to use: Dump the waste & cover with 2 cms of soil. In plant part fill soil/seed/sapling. Water this for season, plant high!

WASTE FILLED, SOIL COVER

2 WEEKS LEVEL FALL

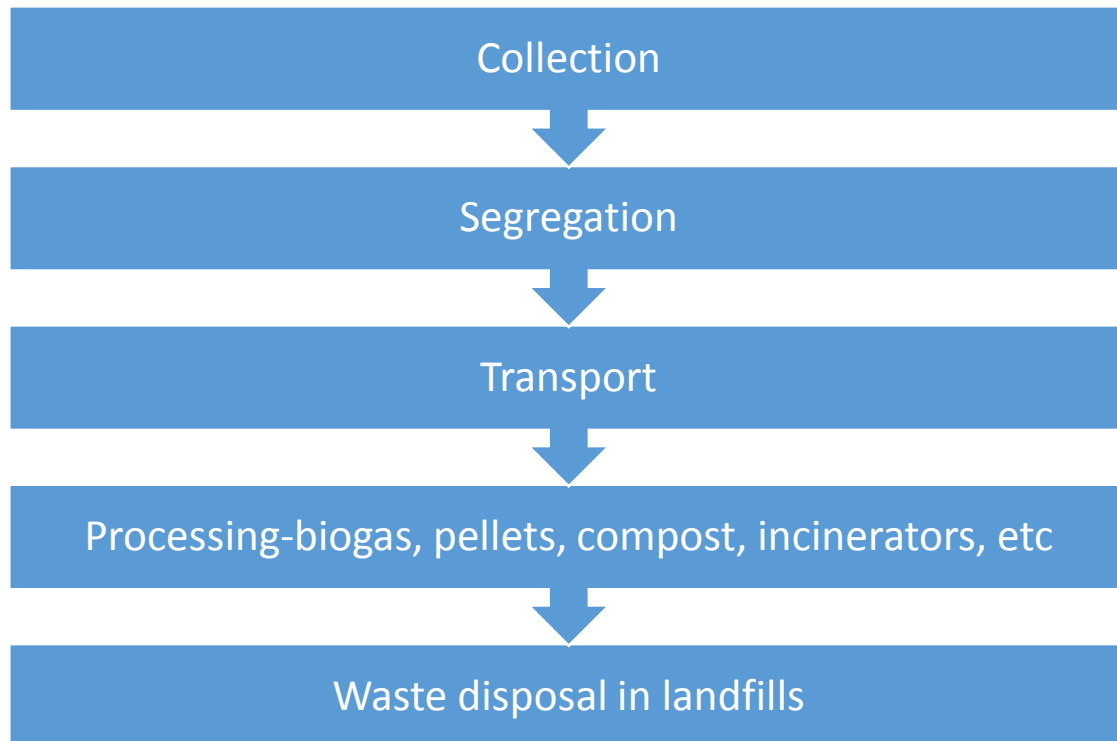

ROOTS IN WASTE PART

Wastes steps for organics (30-50% of city wastes)

Old

- Huge energy & CO2, costs (manpower, vehicles, diesel, land costs, etc)

NEW

Swachh Ecopots- direct plant growing!

- Like rain water harvesting , owner also installs
- Low recurring costs for seeds, NPK, organic pesticides.
- Collect paper, glass, plastics /2 week

Health, wealth, happiness from organic wastes-garbage market!

- Organic wastes are NPK loaded- fertiliser for new plants!
- Why not compost & grow plants now in same Ecopots?
- Why waste time. Money, power, for separate composting?
- Ours is few minutes dumping of wastes& plant care tech.
- No organic waste collection is less waste volumes, clean landfills, no methane, landfill fires& pollution!
- Brown roof cities can be green ,O₂& healthy veggis producing, less CO₂&air pollution
- 7 billion population needs less garbage, more food, clean air!

Garbage garden mission-NEW solution

SB listed tech:http://www.indiawater.gov.in/misc/InnovationProvenTech_Rep_S.aspx
proven techs II18 Ecopots

For Governments

- Easy to teach use of pots
- Organics form 30- 50% of wastes- now grow veggies, O₂, clean air
- COP21 initiative-green roof tops is cool, clean air cities
- Garbage cost can be reduced!
- Pollution air, water, landfill less!

For users

- Low once cost!
- Chemical free veggies, less cancer, diabetes, longer life!
- 5 minutes/day, use less water!
- Garden is stress buster.
- Teach kids on farming!
- Gift to others, we need more foods, O₂, less CO₂&garbage.

GARBAGE FREE CITIES –GREEN –ECOPOTS-save earth! 21 century, urban waste, healthy, happy tech!

- Eliminate organic wastes (40-50% of wastes)in home garbage garden
- Vegetable plants (3 month life,3crop/year) gives food, O₂, clean air!
- Urban homes can be garbage eliminators, food & clean air makers!
- 20 pot with 30 plants gives 30-50Kg vegis,7000litersO₂/year/family !
- 4000RSoonce cost/ family for years of use-UV stable outdoor use!
- Plan plants for season, soil, culture for years of happiness!
- Plants use CO₂-give O₂, clean air, food, more with wastes manure!
- 5-10 minutes/ day/ plant care, waste dumping-stress relieving!
- We can save Earth-more plants, green roof cities, less garbage cost!
- Thank you for greening earth!
