

# The Largest Portfolio of Efficient Solutions

Building up on the [1000 Solutions challenge](#) , the Solar Impulse Foundation is creating the world's most extensive sustainable solution database. The [Solutions Explorer](#) is the unique search engine designed to bring these solutions directly to those ready to implement them.

## The Goal

To equip all stakeholders—whether policymakers, corporations, or individuals—with the necessary tools and knowledge to make informed choices, foster innovation, and actively contribute to a sustainable future.

## > Explore thousands of solutions...

Navigate through an extensive array of solutions, both technological and non-technical solutions, along with real-world implementation stories. The platform includes everything from cutting-edge innovations to best practices and legal projects searchable by various criteria including sectors, applications, region of origin, maturity level and more...

## > A Step Further for Credibility

Selected tech-based solutions, have been identified and certified under the Solar Impulse Efficient Solution Label, vetted by External Independent Experts and evaluated on environmental and economic criteria via an EY-audited process.
