

1000 EFFICIENT SOLUTIONS TO PROTECT THE ENVIRONMENT IN A PROFITABLE WAY.

“ Today, thousands of solutions exist that can boost economic growth while preserving nature, but they are often hidden in start-ups or research labs. They remain unknown to decision makers and are not implemented at industry level, so few people realize that everyone can use them and how profitable they have become. We need to embrace clean technologies and efficient solutions, because they are much more than ‘ecological,’ they are ‘logical’. ”

Dr. Bertrand Piccard, Initiator and Chairman of the Solar Impulse Foundation

AN ALLIANCE TO FEDERATE

The World Alliance for Efficient Solutions brings together the main actors in the field of clean technologies to create synergies, facilitate matchmaking between solution providers and investors, and showcase clean and profitable solutions that have the potential to address today's environmental challenges.

A LABEL TO BRIDGE THE GAP BETWEEN ECONOMY AND ECOLOGY

By working together with independent experts and recognized institutions, the World Alliance offers to its members an assessment of their solutions entirely free of charge against five criteria grouped in three different themes: Feasibility, Environmental Impact and Profitability. Labelled solutions will be gathered into a Portfolio of #1000solutions.

A VOICE TO ENCOURAGE THE IMPLEMENTATION OF SOLUTIONS

One of the first to envision ecology through the lens of profitability, and an influential thought leader on the topics of progress and sustainability, Bertrand Piccard will travel the world to present the #1000solutions Portfolio to governments, companies, and institutions. His goal is to help them adopt more ambitious environmental targets and energy policies.
